Professionelle Wahrnehmung von Störungen im Unterricht Victoria L. Barth, 2016-11-04 Die Autorin entwickelt eine videobasierte Fallanalyse mit offenem Antwortformat zur professionellen Wahrnehmung von Unterrichtsstörungen. Die Ergebnisse der Fallanalyse aus einer Studie mit 452 Lehramtsstudierenden können in der Lehrerinnenbildung gezielt zur Förderung der Wahrnehmungskompetenz für Problemsituationen eingesetzt werden. Da eine professionelle Wahrnehmung als wesentlicher Erfolgsfaktor für eine effektive Störungsprävention und intervention gilt, wird das Konstrukt umfassend theoretisch beleuchtet sowie einzelne Facetten empirisch untersucht. Ein Vergleich bisheriger Modellierungsansätze dient der Entwicklung eines differenzierten Kompetenzmodells zum professionellen Wahrnehmen und Handeln im Unterricht.

Keine halben Sachen - aufs Ganze gehen! Kilian Stark, 2020-02-01 Die kirchlich pastorale Landschaft der letzten Jahre ist geprägt von strukturellen Umgestaltungen und einer verstärkten Wahrnehmung des sozial diakonischen Charakters von Kirche. Diese empirische Studie geht der Frage nach, welchen Einfluss die pastoralen Umstrukturierungen in den deutschen Diözesen auf das Miteinander von Caritas als Grundvollzug bzw. Caritas als Organisation und Pastoral als verfasste Kirche haben. Damit weitet sie den Horizont auf Grundfragen kirchlicher Präsenz und leistet einen beachtenswerten Beitrag für aktuelle Prozesse der Kirchenentwicklung. Welches sind gelingende Faktoren, die beide kirchliche Teilsysteme Caritas und Pastoral gemeinsam aufs Ganze gehen lassen, damit Caritas immer wieder aktuell zum Wohl der Menschen verwirklicht werden kann?

to handle the inherent non independence of network data the results of ERGM are interpreted in similar ways to logistic regression making this a very useful method for examining social systems Recent advances in statistical software have helped make ERGM accessible to social scientists but a concise guide to using ERGM has been lacking This book fills that gap by using examples from public health and walking the reader through the process of ERGM model building using R statistical software and the statnet package An Introduction to Exponential Random Graph Modeling is a part of SAGE s Quantitative Applications in the Social Sciences QASS series which has helped countless students instructors and researchers learn cutting edge quantitative techniques

The Impact of Gender Differences on the Conflict Management Styles of Managers in Bangladesh Khair Jahan Sogra, 2014-10-02 This book examines the impact of gender on the choice of conflict management styles of managers in Bangladesh It explores the influence of contextual factors including the present socio cultural and economic changes taking place in Bangladesh on the choice of conflict management styles of managers in Bangladesh and the factors that might create gender differences in managerial styles In doing so the book includes factors such as age education managerial hierarchy gender role orientation and gender stereotyped organisational environment as well as biological sex The book suggests that exhibiting socially expected roles and using conflict management modes do not occur in vacuums Both factors are intensely affected by socio cultural expectations governed by a rigid patriarchal system organisational processes and the magnitude of individuals unsatisfied needs All these factors in various combinations affect the managerial styles of managers and female managers imitate the well accepted male managerial styles as a survival mechanism in the workplace This results in no apparent gender differences in the preference of conflict management styles among managers though the reasons for choosing a particular style may not be the same for females and males This book also asserts that globally organisations are steadily moving away from a mechanistic approach to a more humanistic approach and with this changing management trend organisations have started appreciating the much condemned feminine quality of relationship oriented managerial style The book maintains that this gradual shift is also taking place in Bangladeshi organisations for certain jobs and organisations and females are becoming sought after employees The cumulative effects of all these rapid changes transforming the socio economic and socio cultural expectations of the Bangladeshi population are leading to calls for urgent attention to the study of their long term effects on patriarchy and gender relations in the workplace This book is a step forward in that direction
