**Handbook of Governance in Small States** Lino Briguglio, Jessica Byron, Stefano Moncada, Wouter Veenendaal, 2020-12-17 This volume covers a wide spectrum of governance issues relating to small states in a global context While different definitions of governance are given in the chapters most authors associate governance with the setting and implementation of policies aimed at managing a country or territory and with the related institutional structures and interventions by political actors Generally good governance is associated with concepts such as policy effectiveness accountability transparency control of corruption encouragement of citizens voice and gender equality factors which are in turn linked with democracy What emerges from the book is that the societies of small states are being re shaped by various forces outside their control including the globalization process and climate change rendering their governance ever more complex These problems are not solely faced by small states but small country size tends to lead to a higher degree of exposure to external factors The chapters are grouped into four sections broadly covering political environmental social and economic governance Governance is influenced by many often intertwined factors the division of the book into four parts therefore does not detract from the fact that governance is multifaceted and such division was based on the primary focus of each particular study and its main disciplinary background The expert authors have moreover used a variety of approaches in the studies the subject of small states being well suited to scholarly work from different disciplines using qualitative quantitative and mixed approaches to arrive at useful conclusions

**Handbook of Small States** Lino Briguglio, 2018-05-11 This handbook covers a wide spectrum of issues relating to small states Chapters in the volume have been grouped under the three main themes of economic social and environmental issues The economics sections include chapters dealing with trade finance and regulatory frameworks while the social theme covers health migration population ageing as well as overall social wellbeing The environmental theme examines matters such as measuring environmental performance natural disasters the ocean economy and the validity of the Sustainable Development Goals One major issue is the definition of small states As this volume demonstrates generally speaking population is used to measure country size in the literature However it clearly emerges that there is no real consensus as to the population cut off point that distinguishes small states from large ones While the approaches taken by the authors vary in all cases the chapters draw practical policy implications for small states The book can therefore be considered as a wide ranging depositary of information on small states with the aim of deriving policy prescriptions and thus as an excellent resource for academics students and policymakers

Populism and the personalization of politics appears to be threatening the existence of democracy as we know it all over the world It is now more important than ever to understand the history of this form of regime why it has thrives and fails But existing studies are limited by their focus on a few large and predominately rich states This book takes the opposite approach it investigates how politics is practiced in the smallest states where hyper personalization has always been a ubiquitous feature of political life It optimistically finds that hyper personalized democracy can actually persist against all odds but also cautions that political practices in small states are often markedly different to larger states *Oxford Studies in Democratization* is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford

**Small States and Shelter Theory** Baldur Thorhallsson,2018-10-03 Small states are dependent on the economic political and societal shelter provided by larger states and international organizations to survive and prosper Iceland provides an ideal case study for shelter theory due both to its smallness as compared with its larger neighbouring states as well as its status as both an entity and then as a state That Iceland has historically been so isolated relative to other small European states also makes it easier to trace the country s interactions with other actors since the impact of each interaction can be measured more definitively thus broadening the theory s validity and offering new insights into its operations The contributors to this volume focus on the extent of Iceland s external engagement with other states and the domestic consequences of this interaction Societal shelter in terms of transfer of norms and values is as of much importance as

economic and political shelter By unpacking the structure of Iceland's external relations this book demonstrates both the size related disadvantages and the unique needs of small states to evaluate explain and predict small state behaviour This book will be of interest to all scholars in international relations especially those interested in small state behaviour Statehood à la Carte in the Caribbean and the Pacific Jack Corbett, 2023-04-15 This book explains how leaders in the Caribbean and Pacific regions balance the autonomy viability dilemma of postcolonial statehood that political self determination is a hollow achievement unless it is accompanied by economic development by practising statehood la carte Previous research has focused on the pursuit of decolonial self determination through and above the nation state via regionalism and internationalism or by creating non sovereign alternatives to it This book looks at how communities have sought the same goals below the state including via secession and devolution Downsizing is typically portrayed as the antithesis of progressive cosmopolitan internationalism and employed as evidence for the claim that the age of anticolonial self determination has ended In this book Jack Corbett shows how these movements are animated by similar ideas and motivations that are rendered viable by the simultaneous pursuit of regional integration and forms of non sovereignty He argues that the la carte pursuit of political and economic independence through above and below the state and via non sovereign alternatives to it is a pragmatic response to the contradictions inherent to coloniality *Insularity and Development* Emilio Biagini, B. S. Hoyle, 1999 This book focuses on the concept of insularity within development theory and within this framework provides a variety of integrated and illustrative cases Insularity is of the highest importance as so many countries are insular in whole or in part yet the concept is not devoid of ambiguity The main focus of the book is on methodological issues and the concept of degrees of insularity is introduced as a tool for a better understanding of the phenomena involved **Handbook on the Politics of Small States** Godfrey Baldacchino, Anders Wivel, 2020-03-28 Comprehensive and timely this Handbook identifies the key characteristics challenges and opportunities involved in the politics of small states across the globe today Acknowledging the historical legacies behind these states the chapters unpack the costs and benefits of different political models for small states **Asia and Pacific Small States Monitor, August 2014** Ms. Shari Boyce, Mr. Sergei Dodzin, Ezequiel Cabezon, Mr. Fazurin Jamaludin, Mr. Yiqun Wu, Ms. Rosanne Heller, 2014-08-01 This issue of the Asia Solomon Islands experienced a continuing decline of logging stocks and a short term disruption of gold production and Timor Leste's ongoing depletion of oil reserves has led to a tighter budget constraint and lower government spending in the non oil sector
