Varieties of European Economic Law and Regulation Kai Purnhagen, Peter Rott, 2014-07-16 This is the first book to comprehensively analyze the work of Hans Micklitz one of the leading scholars in the field of EU economic law It brings together analysts academic friends and critics of Hans Micklitz and results in a unique collection of essays that evaluate his work on European Economic Law and Regulation The contributions discuss a wide range of Micklitz work from his theoretical work on private law beyond party autonomy with a special focus on its regulatory function to the illustration of how his work has built the basis for current solutions such as used in solving the financial crisis The book is divided into sections covering foundations of private law regulatory law competition and intellectual property law product safety law consumer contract law and the enforcement of law This book clearly shows the enormous impact of Hans Micklitz work on the EU legal system in both scholarship and practice

Formal Theories in International Relations Michael Nicholson, 1989 This book first published in 1989 gives a critical account of formal international relations theory That formal and mathematical methods can be applied to the study of international relations is often regarded with surprise but the author demonstrates not only how these methods give insights into problems such as deterrence or arms races but also that the increase in the power of explanatory tools depends on the more rigorous development of theory along these lines Mathematical methods have been applied to the study of international behaviour since the pioneering work of Lewis Fry Richardson in the 1920s and 1930s However it was in the post Second World War period that they became widespread Dr Nicholson discusses the application of such methods as the theory of games to problems of relationships between states catastrophe theory to the study of initiation of violence and probability theory to the question of the probability of nuclear war
