Kontrolle als Lernprozess Utz Schäffer, 2013-03-08 Utz Schäffer entwickelt allgemeine Leitlinien an der Maximierung des Kontrollerfolgs orientierte Leitlinien für die Gestaltung und Entwicklung von Akteurskonstellationen und Aufgaben der Kontrolle

Die Gestaltung der Budgetkontrolle Julia Künkele, 2007-11-10 Geleitwort Das von Künkele gewählte Thema ist in hohem Maße relevant Die zu Grunde liegende Budgetierung gilt als das Instrument zur Prognose Koordination und Motivation in plankoordinierten Unternehmen und wird vielfach auch als Rückgrat der Unternehmenssteuerung bezeichnet Entsprechend nimmt sie einen zentralen Platz in der Arbeit von Managern und Controllern ein Dennoch oder gerade deshalb ist die Budgetierung in den letzten Jahren vielfach kritisiert oder gar für obsolet erklärt worden Während diese Kritik und die sich daran anschließende Diskussion durchaus fruchtend wirken können erscheint bedauerlich dass beides bislang ausschließlich auf konzeptionellen Vorschlägen und anecdotal evidence beruht Empirische Arbeiten jüngeren Datums die den Status Quo der Budgetkontrolle in der Unternehmenspraxis aufzeigen und oder zur Falsifizierung der in der aktuellen Diskussion explizit oder implizit aufgestellten Thesen beitragen könnten liegen nicht vor Die letzte empirische Bestandsaufnahme zur Budgetkontrolle in deutschen Unternehmen liegt fast 20 Jahre zurück und beschränkt sich auf das verarbeitende Gewerbe Dies mag auch daran liegen dass das Konzept in Wissenschaft und Praxis vielfach gemieden und durch scheinbar weniger problematische Begriffe ersetzt wird ja in kaum mehr zu zählenden Controllingpublikationen betont wird dass Controlling doch mit Kontrolle wenig am Hut habe Allein Die Empirie spricht eine andere Sprache Vor diesem Hintergrund setzt Künkele die noch junge Tradition von Arbeiten am Lehrstuhl Controlling der EUROPEAN BUSINESS SCHOOL fort die der Kontrolle die Bedeutung einräumen die ihr in der Unternehmenspraxis auch zukommt

Woodman, William A. Pasmore, Abraham B. (Rami) Shani, 2009-05-21 An annual publication featuring studies and theoretical work dealing with the topic of change in organizational settings Showcasing the approaches to organizational research whether they be quantitative or qualitative in nature it includes papers that bring fresh perspectives to classic issues in the field such as resistance and communication *The Truth About Markets* John Kay, 2004-04-29 Capitalism faltered at the end of the 1990s as corporations were rocked by fraud the stock market bubble burst and the American business model unfettered self interest privatization and low tax faced a storm of protest But what are the alternatives to the mantras of market fundamentalism Leading economist John Kay unravels the truth about markets from Wall Street to Switzerland from Russia to Mumbai examining why some nations are rich and some poor why one size fits all globalization hurts developing countries and why markets can work but only in a humane social and cultural context His answers offer a radical new blueprint for the future **Don't Tell the Boss!** Dmitry Chernov, Didier Sornette, Giovanni Sansavini, Ali Ayoub, 2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in

China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak

We are Millions Marcela López Levy,2004 Since the 1970s a brutal transference of resources from the poor to the rich has taken place here in Argentina This book looks at the politics which led to mass poverty and unemployment and describes the rich and varied social responses to economic meltdown and political crisis Dangerous Decisions E. Mumford,2007-08-28 In a world where technology is continually advancing and problems are becoming more and more complex established practices for decision making and problem solving are no longer effective In this new book however Enid Mumford draws on her

wealth of experience in management business schools and working with the police and other professional problem solvers to show us how to tackle complex problems efficiently With drugs and cyber crime as her main examples Professor Mumford shows how these topical yet apparently permanent problems could be approached She does this by looking at how the criminals themselves have overcome legal obstacles and other problems to make the drug trafficking industry the second largest in the world today and the relative newcomer electronic fraud a multi billion dollar problem already These crimes which in themselves lead to more crime from petty theft to support a drug habit to international money laundering are incredibly complex and yet the book shows us that there is not only a way forward with these issues but a way to approach all complex problems with efficiency and competency wherever they occur in our lives **The Countryside** Corinne

Fowler, 2024-06-11 Ten walks through idyllic scenery reveal the countryside's forgotten links to transatlantic slavery and colonialism a work of accessible history that will transform our understanding of British landscapes and heritage The green fields rugged highlands and rolling hills of England Scotland and Wales are commonly associated with adventure romance and seclusion as well as literary figures like Jane Austen and William Wordsworth But in reality many of these rural places with their country houses lakes and shorelines were profoundly changed by British colonial activity Even hamlets and villages were affected by distant colonial events Taking ten country walks author Corinne Fowler explores the unique colonial dimensions of British agriculture copper mining landownership wool making coastal trade and factory work in cotton mills One route shows the links between English country houses and Indian colonization Another explores banking history in Southern England and its link to slavery on Louisianan plantations Other walks uncover the historical impact of sugar profits on the Scottish isles and 18th century tobacco imports on an English coastal port The history of these countryside locations and the people who lived and worked in them is closely bound up with colonial rule in far away continents Accompanying the author on her walks are a fascinating group of people artists musicians and writers with strong attachments to the landscapes featured in this book and family links to former British colonies like Barbados and Senegal These companions illuminate the meaning of colonial history in local settings Crucially this is not just a history book but a compassionate reflection on the way we respond to sensitive shared histories which link people across cultures generations and political divides
