Coastal Hazard Mitigation Alternatives For Rising Seas David Basco, 2020-07-02 This timely book is about how to design alternatives to reduce coastal flood and wave damage erosion and loss of ecosystems facing an unknown future of sea level rise The latest theories are interlaced with applied examples from the authors 48 years of experience in teaching research and as a practicing professional engineer in coastal engineering The design process takes into consideration all the design constraints scientific engineering economic environmental social political institutional aesthetic and media to meet today's client needs expectations and budgets for an uncertain future The book is organized as a textbook for graduate students And it is a self contained reference for government and consulting engineers responsible for finding solutions to coastal hazards facing the world's coastal populations New solutions are included in the book that help people of all socio economic levels living at the coast Both risk reduction metrics quantified in monetary terms and increased resilience metrics quantified as vulnerability reduction must now be taken into consideration to make equitable design decisions on hazard mitigation alternatives In the Anthropocene Era under deep uncertainty in global mean sea level predictions for the future today's designs must mitigate today's storm damages and be adaptable for the unpredictable water levels and storms of the future This book includes a design philosophy for water levels to year 2050 and for the long term from 2050 to 2100 Multiple spreadsheets are provided and organized to aid the design process This is an exciting time to be thinkers as Civil Coastal engineers Related Link s [Geotechnical Engineering and Sustainable Construction](#) Mahdi O. Karkush, Deepankar Choudhury, 2022-03-19 This book contains selected articles from the Second International Conference on Geotechnical Engineering Iraq ICGE Iraq held in Akre Duhok Iraq from June 22 to 23 2021 to discuss the challenges opportunities and problems of geotechnical engineering in projects Also the conference includes modern applications in structural engineering materials of construction construction management planning and design of structures and remote sensing and surveying engineering The ICGE Iraq organized by the Iraqi Scientific Society of Soil Mechanics and Foundation Engineering ISSSMFE in cooperation with Akre Technical Institute Duhok Polytechnic University College of Engineering University of Baghdad and Civil Engineering Department University of Technology The book covers a wide spectrum of themes in civil engineering including but not limited to sustainability and environmental friendly applications The contributing authors are academic and researchers in their respective fields from several countries This book will provide a valuable resource for practicing engineers and researchers in the field of geotechnical engineering structural engineering and construction and management of projects **Headland-bay Beaches: Static Equilibrium Concept For Shoreline Management** Rong-chung John Hsu, Jung Lyul Lee, Antonio Henrique Da Fontoura Klein, Mauricio Gonzalez, Raul Medina, 2021-06-22 Headland bay beaches HBBs are ubiquitous in coastal environment They exist around the world naturally or artificially as byproduct of engineering project Though in various shapes sizes and stability a HBB in static equilibrium not only is a delight for visitors but also offers hope for better beach protection restoration recreation and shoreline management With an empirical parabolic model now

available the stability of an existing HBB can be verified the future bay shape downdrift of a harbor can be predefined and a stable HBB can be designed Although a plethora of books are available for coastal and ocean engineering and geomorphology only a countable few have covered engineering applications of HBBs On the contrary this book with focus on the HBBs in static equilibrium aims to offer a comprehensive volume with knowledge and applications for coastal scientists engineers managers students and the general public interested in HBBs Useful software tools for HBBs MEPBAY MeePaSoL and SMC are introduced in the book to aid in applications The authors have set out to make this book the first unique publication on HBBs by bringing together the old coastal geomorphic knowledge and new concepts for static bay beaches This book also provides numerous examples using the static bay beach concept to assist coastal scientists and engineers on planning and pre design of a stable HBB and for experimentalists consultants and numerical modelers to alleviate the burden of comparing planning options and conducting laborious physical experiments on coastal sedimentation problems
