, 2012-12-06. The need for this book has arisen from demand for a current text from our students in Petroleum Engineering at Imperial College and from post experience Short Course students. It is however hoped that the material will also be of more general use to practising petroleum engineers and those wishing for an introduction into the specialist literature. The book is arranged to provide both background and overview into many facets of petroleum engineering, particularly as practised in the offshore environments of North West Europe. The material is largely based on the authors' experience as teachers and consultants and is supplemented by worked problems where they are believed to enhance understanding. The authors would like to express their sincere thanks and appreciation to all the people who have helped in the preparation of this book by technical comment and discussion and by giving permission to reproduce material. In particular, we would like to thank our present colleagues and students at Imperial College and at ERC Energy Resource Consultants Ltd for their stimulating company. Jill and Janel for typing seemingly endless manuscripts. Dan Smith at Graham and Trotman Ltd for his perseverance.
