Behavioural Finance:

Behavioural Finance William Forbes, 2009-12-21 Behavioural Finance builds on the knowledge and skills that students have already gained on an introductory finance or corporate finance course. The primary focus of the book is on how behavioural approaches extend what students already know. At each stage the theory is developed by application to the FTSE 100 companies and their valuation and strategy. This approach helps the reader understand how behavioural models can be applied to everyday problems faced by practitioners at both a market and individual company level. The book develops simple formal expositions of existing attempts to model the impact of behavioural bias on investor managers' decisions. Where possible this is done grounding the discussion in practical numerical examples from the financial press and business life.

Behavioral Finance Rolf J. Daxhammer, Mate Facsar, 2017-02-13 Seit über 50 Jahren dominiert die neoklassische Kapitalmarkttheorie unser Verständnis für die Abläufe an Finanzmärkten. Sie hat eine Vielzahl von Theorien und Konzepten z.B. Portfoliotheorie, Capital Asset Pricing Model oder Value at Risk hervorgebracht und basiert auf der Annahme eines streng rationalen Homo Oeconomicus. Das vorliegende Buch möchte Praktikern die Tür öffnen zu einer neu entstehenden verhaltenswissenschaftlichen Sicht auf die Finanzmärkte in der ein realitätsnäherer Homo Oeconomicus/ Humanus an den Märkten agiert. Er setzt bei der Entscheidungsfindung begrenzt rationale Heuristiken ein und lässt sich von emotionalen Einflüssen lenken. Die Autoren schlagen zunächst den Bogen von der neoklassischen Sicht der Finanzmärkte zur Behavioral Finance. Anschließend werden spekulative Blasen von der Tulpenmanie bis zur Subprime Hypothekenblase als Anzeichen für begrenzte Rationalität an Finanzmärkten ausführlich vorgestellt. Danach stehen die Heuristiken bei Anlageentscheidungen an Wertpapiermärkten im Vordergrund. Die dadurch ausgelassenen Verzerrungen werden entsprechend ihrer Risiko/Renditeschlichkeit im Rahmen des RRS-Index eingeordnet. Abschließend werden Beispiele für die Anwendung der Behavioral Finance Erkenntnisse im Wealth Management und Corporate Governance diskutiert und es wird ein Blick auf aktuelle Entwicklungen der Neuro Finance und Emotional Finance geworfen. In dieser Auflage neu hinzugekommen ist Financial Nudging, einer besonders vielversprechenden Anwendung von Behavioral Finance Erkenntnissen.

Dieses Buch präsentiert die Forschungsergebnisse einer internationalen Autorenschaft. Sie reichen von der rein kapitalmarktorientierten Forschung über die Unternehmensfinanzierung und das Management bis hin zur Unternehmensrechnung und bieten großen Nutzen für die Praxis. Die Beiträge liefern nicht nur Studierenden und Forschenden an Universitäten und Fachhochschulen sondern auch interessierten Praktikern neue und nützliche Erkenntnisse.

Dawn of Behavioural Finance, 1688 Vasileios Kallinterakis, 2024-11-03 The role of psychology in investment decisions has been amply debated during the past few decades following the evolution of behavioural finance This book shows that although behavioural finance concepts were coined systemised since the 1980s their first traces are identified in Joseph de la Vega's Confusion of Confusions written in 1688 over 300 years ago To that end the book provides the first comprehensive assessment of Confusion of Confusions from the perspective of the behavioural finance paradigm Offering also a detailed discussion of behavioural finance itself and the historical context of Vega and his time it demonstrates that Confusion of Confusions constitutes the precursor to behavioural finance This book should be of interest to finance researchers and students particularly those focusing on behavioural finance and financial history The book's educational value for investors further renders it relevant to regulators and policy makers who can consider including it in financial education curricula

Behavioural Finance and its impact on the credit crunch in 2009 Patrick Kemtzie, 2015-02-01 In the last decades many financial crises have emerged like the stock crash of 1987 the Asian crisis in 1997 and the global financial crisis that started in 2008 Although those crises occurred for different reasons they all proved financial markets to be inefficient Not all traders think rationally Behavioural patterns cause irrationality amongst traders Even after decades of research in this field financial crises like the latest one in 2008 still develop out of a combination of different behavioural patterns like herding As a consequence those patterns deserve an in depth analysis that is conducted by the author in this work In order to find out to what extent behavioural finance influences the decision making process of traders and investors the seven most relevant behavioural patterns have been identified and analysed through qualitative research in form of primary research The informal interview with the sophisticated trader Thomas Vittner serves as empirical evidence for the significance of the determined behavioural patterns To find out whether public investors and traders showed a herding behaviour towards analysts stock recommendations in the financial crisis and its recovery quantitative research has been made by conducting an experiment Stocks performances in relation to analysts recommendations were analysed and evaluated The author s selected behavioural patterns are influencing traders and investors decision making processes to a large extent as their majority trades irrationally The herding behaviour to follow analysts stock recommendations only holds partially in the crisis and in the recovery phase The results show that whereas the majority of analysts recommendations matched with market trends before the crisis only about half matched during the crisis and its recovery People tended to follow the general signals of the market rather than to recommendations given by analysts **Diploma in Behavioural Finance and Wealth**
