Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., card) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully).

ARGUMENTS

amount
required

A positive integer representing how much to charge, in the smallest currency unit (e.g., `100` cents to charge $1.00, or `100` to charge ¥100, a zero-decimal currency). The minimum amount is $0.50 USD or equivalent in charge currency.

currency
required

Three-letter ISO currency code, in lowercase. Must be a supported currency.

application_fee
optional

A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an OAuth key or the `Stripe-Account` header in order to take an application fee. For more information, see the application-fees documentation.

Curl   Ruby   Python   PHP   Java   Node   Go   .NET

`POST` `/v1/charges`

Example Request

```
curl https://api.stripe.com/v1/charges \
