Progettazione e calcolo di elementi e connessioni in acciaio Carlo Sigmund, 2020-03-17 T00:00:00+01:00 L'opera focalizza l'attenzione sul panorama delle più importanti formulazioni che maggiormente sono impiegate nella progettazione degli

elementi in carpenteria metallica e nel progetto delle relative connessioni In particolare si pongono all'attenzione alcune personali osservazioni in merito ai risultati di alcune formulazioni proposte dalla norma europea da cui le NTC attingono e in alcuni punti addirittura rimandano evidenziandone i lati positivi e negativi sia dal punto di vista della mera schematizzazione matematica adottata sia in correlazione ai risultati sperimentali disponibili al momento in letteratura Ormai indubbio che le NTC verranno in un prossimo futuro completamente sovrascritte dagli Eurocodici ed proprio questa convinzione che mi spinge a ritenere di maggiore peso e considerazione l'intero corpo normativo degli Eurocodici una vastissima norma che sempre di più ormai pressa alla sfida di un passaggio di consegne definitivo

Steel Connection Analysis Paolo Rugarli, 2018-02-15 First book to discuss the analysis of structural steel connections by Finite Element Analysis which provides fast efficient and flexible checking of these vital structural components The analysis of steel structures is complex much more so than the analysis of similar concrete structures There are no universally accepted rules for the analysis of connections in steel structures or the analysis of the stresses transferred from one connection to another This book presents a general approach to steel connection analysis and check which is the result of independent research that began more than fifteen years ago It discusses the problems of connection analysis and describes a generally applicable methodology based on Finite Element Analysis for analyzing the connections in steel structures That methodology has been implemented in software successfully providing a fast automatic and flexible route to the design and analysis of the connections in steel structures Steel Connection Analysis explains several general methods which have been researched and programmed during many years and that can be used to tackle the problem of connection analysis in a very general way with a limited and automated computational effort It also covers several problems related to steel connection analysis automation Uses Finite Element Analysis to discuss the analysis of structural steel connections Analysis is applicable to all connections in steel structures The methodology is the basis of the commercially successful CSE connection analysis software Analysis is fast and flexible Structural engineers fabricators software developing firms university researchers and advanced students of civil and structural engineering will all benefit from Steel Connection Analysis
