**Design Behind Interaction** Umberto Tolino, Ilaria Mariani, 2024-08-07 This book investigates how digital transformation and technological innovations are challenging traditional design paradigms and redefining the conception of interfaces suggesting a future where interfaces seamlessly integrate into or disappear within smart objects Through the lens of Think a university spin off of the Politecnico di Milano it addresses the practical application of theoretical design research in creating objects that while analog in appearance are

technologically augmented embracing a multidisciplinary approach that includes product design communication and interaction design Covering an eight year span of experimental design and analysis it dives into how smart objects leverage context awareness and situated meanings engaging users from research and co creation to validation The significance of this book lies in its comprehensive analysis and insights into the design process behind such objects underscoring the need for thorough examination of how semantic reconfigurations impact on affordances and agency With a strong emphasis on a research through design approach and case studies it bridges theoretical inquiry with practical applications offering insights into the potentials of design driven innovation in evolving user experiences *Design, User Experience, and Usability.*
