Student Exploration: Determining Density via Water Displacement

Essential understandings: principles, density displacement; deeper, volume

Prize Knowledge Questions: How do we determine the volume of an object?

- What happens when an object is submerged?
- How does the volume of an object change when it is submerged?

- How do we determine the volume of an object?

Volume is the amount of space an object takes up.

When you submerge an object in water, the water level rises. The amount the water level rises is the volume of the object. This is the principle of displacement, which states that the volume of an object is equal to the volume of the liquid it displaces.

The relationship between the volume of an object and the volume of the liquid it displaces is the **principle of displacement**. This principle states that the volume of an object is equal to the volume of the liquid it displaces.

- How do we determine the volume of an object?
- How do we determine the volume of an object?
- How do we determine the volume of an object?
- How do we determine the volume of an object?

Answer: The volume of an object is the amount of space it takes up.
