Handbook of Research on Socio-Cultural and Linguistic Perspectives on Language and Literacy Development Salmon, Angela K., Clavijo-Olarte, Amparo, 2022-10-07 The teacher's role is to create opportunities that intrinsically motivate children to externalize their thoughts. Human beings have multiple means of expression; this is powerful when children have the opportunity to have a real voice. The realities of children's experiences in their local communities are powerful resources for the language curriculum and help to create an understanding of the value the languages and cultures of children and teachers bring from a multicultural perspective. Thus, teachers can help children develop their cultural and linguistic identities to promote multiculturalism, multilingualism, and translingualism so they can thrive in a complex and changing world. The *Handbook of Research on Socio-Cultural and Linguistic Perspectives on Language and Literacy Development* approaches language and literacy development from a socio-cultural and linguistic perspective. This book offers global perspectives on language and literacy from international experts working with both children and educators. It offers readers a diversity of voices and experiences of professionals in the field that can inform their teaching and research. Covering topics such as critical literacy, emotional engagement, and multilingual resources, this major reference work is an indispensable resource for administrators and educators of both K-12 and higher education: pre-service teachers, teacher educators, bibliotherapists, librarians, researchers, and academicians.

Journal of Developmental Reading, 1964 **Resources in Education**, 1999-04 **Navigating Teacher Education in Complex and Uncertain Times** Carmen I. Mercado, 2019-04-04 Carmen I. Mercado draws on four decades of seminal research and theory on how American children who come from homes where languages other than English are spoken learn to read and to write in school to reveal aspects of locally responsive planning and adaptations that should be central to any teacher education program that hopes to serve its unique local population base responsibly. Mercado uses a range of theoretical lenses, particularly those surrounding critical theory, the approach designed to deconstruct power relationships in society to capture and explain the complexities of the teaching-learning process, making visible institutional, social, and political influences clear. She explores an extensive collection of tools and resources for teaching to explore how educators can inform their thinking and shape their own practices to broaden access to people and resources and to influence classroom instruction as school populations become increasingly diverse on a global scale through immigration. Mercado also shows how self-study has been a key aspect of her program's evolution, suggesting that teacher education should be informed by teacher educators' own investigations into their own programs and processes that each teacher educator ought to be an active reinventor of her own program based on reflection on current data. Mercado sensitively draws together the technical and emotional dimensions of learning to teach, acknowledging that critical theory can bring up deep, often uncomfortable feelings of anger, guilt, resentment, and other responses to unfair conditions. However, since schools are designed as places of opportunity, facing these responses is

essential at a time with the feelings of antagonism that characterize the present day world and its conflictual social groups Mercado offers the opportunity to address these facets of educational process in compelling informed ways **Proceedings of AC 2017** Group of authors,2017-08-10 International Academic Conference in Prague 2017 Research in Education,1974 **Civic Engagement Pedagogy in the Community College: Theory and Practice** Emily Schnee,Alison Better,Marttha Clark Cummings,2015-11-19 This book will help post secondary educators to discover the joys and challenges of implementing theoretically grounded civic engagement projects on their campuses The essays on civic engagement and public scholarship are written by an interdisciplinary group of community college faculty who have designed and implemented civic engagement projects in their classrooms The projects they describe stand at the intersection of research theory and pedagogy They challenge dominant constructions of civic engagement as students bring their community culture and history into the classroom The authors consider the particular complexities and constraints of doing civically engaged teaching and scholarship at the community college level and situate their projects within current theoretical debates about civic engagement public scholarship and public higher education **Syllabus in English for Secondary Schools** New York (State). Bureau of Curriculum Development,1962 **Literacy Teaching and Learning in Rural Communities** Lisa Schade Eckert,Janet Alsup,2014-12-17 This definitive look at teaching English in rural secondary schools contests current definitions and discussions of rural education examines their ideological and cultural foundations and presents an alternative perspective that conceptualizes rural communities as diverse unique and conducive to pedagogical and personal growth in teaching and learning Authentic narratives document individual teachers moments of struggle and success in learning to understand value and incorporate rural literacies and sensibilities into their curricula The teachers stories and the scholarly analysis of issues raised through them illuminate the unique challenges and rewards of teaching English in a rural school and offer helpful insights and knowledge for navigating the pedagogical landscape **Online Teaching in the Digital Age** Pat Swenson,Nancy A. Taylor,2012-01-18 Online Teaching in the Digital Age provides educators with the essential knowledge needed to successfully develop and teach an online course Throughout this practical hands on guide the authors offer 15 years of personal online teaching experience in language accessible to both the novice and advanced online educator Developed through theory and practice the text shows educators how to take the materials used in a traditional classroom and transfer them to a new virtual environment Additionally it gives educators the confidence and skills needed to run real time synchronous and time arranged asynchronous online discussions Most reassuring of all this book shows that few traditional course elements need to change in order to start teaching online Handbook of Research on Active Learning and Student Engagement in Higher Education Keengwe, Jared,2022-06-10 Active learning occurs when a learning task can be related in a non arbitrary manner to what the learner already knows and when there is a personal recognition of the links between concepts The most important element of active learning is not so much in how information is presented but how new

information is integrated into an existing knowledge base In order to successfully implement active learning into higher education its effect on student engagement must be studied and considered The Handbook of Research on Active Learning and Student Engagement in Higher Education focuses on assessing the effectiveness of active learning and constructivist teaching to promote student engagement and provides a wide range of strategies and frameworks to help educators and other practitioners examine the benefits challenges and opportunities for using active learning approaches to maximize student learning Covering topics such as online learning environments and engagement approaches this major reference work is ideal for academicians practitioners researchers librarians industry professionals educators and students

Ad Veritatem, 2004 *Transiciones* Todd Ruecker, 2015-02-15 *Transiciones* is a thorough ethnography of seven Latino students in transition between high school and community college or university Data gathered over two years of interviews with the students their high school English teachers and their writing teachers and administrators at postsecondary institutions reveal a rich picture of the conflicted experience of these students as they attempted to balance the demands of schooling with a variety of personal responsibilities Todd Ruecker explores the disconnect between students writing

experiences in high school and higher education and examines the integral role that writing plays in college. Considering the almost universal requirement that students take a writing class in their critical first year of college, he contends that it is essential for composition researchers and teachers to gain a fuller understanding of the role they play in supporting and hindering Latina and Latino students' transition to college. Arguing for situating writing programs in larger discussions of high school/college alignment, student engagement and retention, *Transiciones* raises the profile of what writing programs can do while calling composition teachers, administrators and scholars to engage in more collaboration across the institution, across institutions and across disciplines to make the transition from high school to college writing more successful for this important group of students. [Academic and Student Affairs in Collaboration](#) Mitchell A. Levy, Bernard A.

Polnarev, 2016-06-10 *Academic and Student Affairs in Collaboration* provides a comprehensive and evidenced-based understanding of the partnerships necessary to achieve an institutional culture devoted to student success. This book provides best practices for fostering and enhancing campus dialogue, career development pathways, academic support services and other important initiatives to increase retention and learning outcomes, improve motivation and goal attainment and enhance institutional accountability. This book is a must-read for scholars, faculty leaders and practitioners in Student Affairs and Higher Education interested in achieving student success at their universities and colleges. [The Framework for Success in Postsecondary Writing](#) Nicholas N. Behm, Sherry Rankins-Robertson, 2017-03-03 Illustrates the widespread applications of the Framework for Success in Postsecondary Writing, especially the eight habits of mind in helping students to be successful not only in postsecondary writing courses but also in four arenas of life: academic, professional, civic and personal.
