With an increasing need for experts to provide solutions to complex disaster scenarios and related management issues across the globe universities and governments are finding it highly relevant to introduce courses on disaster management Disaster management education could help in disaster mitigation and

could save several lives as well as assets Written in simple language by disaster professionals most of whom have dedicated their entire careers to disaster management this book will be an important textbook for graduate and postgraduate research students It provides the history of disaster management especially governance issues and scientific and technological development in the areas of disasters including recovery processes which have drastically reduced the loss of lives This book not only unfolds the process of evolution of disaster management and challenges faced by experts in the field but also suggests various ways in which we can build a resilient country *Encyclopedia of Disaster Relief*, 2011 *Disaster Management* R. Subramanian, Disaster Management is an intended textbook for students pursuing a first and intermediate course on the subject in any undergraduate programme especially engineering courses like civil structural geotechnical engineering and other specialized courses on the subject The latest AICTE and the earlier UGC model curriculums have been extensively consulted to design the contents of the book The main objective of the book is to create awareness about and understanding of disasters and disaster mitigation measures It deals with the subject in a structured manner Starting with an introductory chapter the book goes to classification of disasters separate chapters on natural and man made anthropogenic disasters basic management concepts four cycle disaster management organizational structures in India and other countries NGOs ethical issues and case studies It follows the assurance of learning model by enumerating the learning objectives in every chapter followed by detailed exposition of each objective and ends with a rich suite of assessment questions

Evaluating Environment in International Development Juha I. Uitto, 2014-04-24 More than twenty years after the Earth Summit was held in Rio de Janeiro in 1992 both national and international actors in governmental and nongovernmental fields are still searching for insights into how sustainable development can be advanced and environmental concerns incorporated into the development agenda more effectively Moreover climate change has emerged as a preeminent challenge to both the environment and to development Evaluating Environment in International Development provides international perspectives and in depth knowledge of evaluating development and the environment and applies evaluation knowledge to climate change mitigation and adaptation The book focuses on the approaches and experiences of leading international organizations not for profits and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision makers It provides novel and in depth perspectives on evaluating environment and sustainability issues in developing countries Moving beyond projects and programmes it considers aspects such as evaluating normative work on the environment and evaluating environmental consequences of economic and social development efforts This original collection should be of interest to scholars of environment studies development studies international relations sustainable development and evaluation as well as practitioners in international organizations and development and environmental NGOs The United Nations as a Knowledge System Nanette Svenson, 2015-10-16 This book seeks to explore how the UN has generated warehoused disseminated structured packaged expanded transferred and leveraged its vast

resources of accumulated information and experience throughout the decades and particularly since the start of the 21st century with the introduction of more connective information and communications technology It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct but often overlapping and intertwining categories knowledge for social and organizational learning knowledge for norm setting and knowledge for creation of products and services Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its global intelligence to educate advocate and serve member countries development Instead of looking at the UN as an international bureaucracy or as a peacekeeping policymaking humanitarian or development entity this work studies the UN as a generator and purveyor of information learning and experience in all of these areas This book will be key reading for all students and scholars of international organizations
