Collecting Across Cultures Daniela Bleichmar, Peter C. Mancall, 2011-03-17 In the early modern age more people traveled farther than at any earlier time in human history Many returned home with stories of distant lands and at least some of the objects they collected during their journeys And those who did not travel eagerly acquired wondrous materials that arrived from faraway places Objects traveled various routes personal imperial missionary or trade and moved not only across space but also across cultures Histories of the early modern global culture of collecting have focused for the most part on European Wunderkammern or cabinets of curiosities But the passion for acquiring unfamiliar items rippled across many lands The court in Java marveled at collected and displayed myriad goods brought through its halls African princes traded captured members of other African groups so they could get the newest kinds of cloth produced in Europe Native Americans sought colored glass beads made in Europe often trading them to other indigenous groups Items changed hands and crossed cultural boundaries frequently often gaining new and valuable meanings in the process An object that might have seemed mundane in some cultures could become a target of veneration in another The fourteen essays in Collecting Across Cultures represent work by an international group of historians art historians and historians of science Each author explores a specific aspect of the cross

cultural history of collecting and display from the dawn of the sixteenth century to the early decades of the nineteenth century As the essays attest an examination of early modern collecting in cross cultural contexts sheds light on the creative and complicated ways in which objects in collections served to create knowledge some factual some fictional about distant peoples in an increasingly transnational world

Collecting Asian Art Markéta Hánová,Yuka Kadoi,Simone Wille,2024-02-29 Rather than centering on the well known collections in Western European and North American museums Collecting Asian Art turns to museum collections of Asian art in Central Europe which emerged from the late 19th century onwards Highlighting the dimensions of Central European connectedness this volume explores how these collections evolved and changed under changing cultural and political conditions from the pre World War I to the post World War II periods With a primary focus on collections of East Asian South Asian and West Asian art in Vienna Prague Berlin Warsaw Krak w Budapest and Ljubljana it outlines the transregional connections and networks that gradually developed Collecting Asian Art locates Asian art across the twentieth century in Central Europe via discourse and ideology and discusses key collections and the way individual collectors built their networks It thus explores transregional connections that developed through collecting activities and strategies in the prewar interwar and postwar eras Contributors also examine the personal connections between a group of Indologists from postwar Prague and modernist Indian artists from the early 1950s to the 1980s and also discuss the systematic archiving of East Asian art collections in Slovenia A concluding conversation looks at colonisation and decolonisation from a broader perspective by approaching it through recent art historical discussions on the global dimensions of modernism By defining the region through its external relationships and its entanglements with regions across Asia rather than as a self contained unit the contributions in this volume outline how these transregional connections and networks evolved and changed over time thus highlighting their singularity in comparison to developments in Western Europe Based on recent research Collecting Asian Art reveals neglected sources while reinterpreting well known ones

The Oxford Handbook of Prehistoric Figurines Timothy Insoll,2017-04-13 Figurines dating from prehistory have been found across the world but have never before been considered globally The Oxford Handbook of Prehistoric Figurines is the first book to offer a comparative survey of this kind bringing together approaches from across the landscape of contemporary research into a definitive resource in the field The volume is comprehensive authoritative and accessible with dedicated and fully illustrated chapters covering figurines from the Americas Europe Africa Asia and Australasia and the Pacific laid out by geographical location and written by the foremost scholars in figurine studies wherever prehistoric figurines are found they have been

expertly described and examined in relation to their subject matter form function context chronology meaning and interpretation Specific themes that are discussed by contributors include for example theories of figurine interpretation meaning in processes and contexts of figurine production use destruction and disposal and the cognitive and social implications of representation Chronologically the coverage ranges from the Middle Palaeolithic through to areas and periods where an absence of historical sources renders figurines prehistoric even though they might have been produced in the mid 2nd millennium AD as in parts of sub Saharan Africa The result is a synthesis of invaluable insights into past thinking on the human body gender identity and how the figurines might have been used either practically ritually or even playfully
