The Marketing / Accounting Interface Robin Roslender, Richard M.S. Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and

generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management

Hopwood, 2005 For the most part we have accepted the impartiality and objectivity of accounting and not recognized how accounting systems are embedded in a country s economic and legal framework In this book international scholars address a number of important questions about the role of accounting in society *Reaching Key Financial Reporting Decisions* Stella Fearnley, Vivien Beattie, Tony Hines, 2011-08-04 The regulatory framework for

financial reporting auditing and governance has changed radically in recent years as a result of problems identified from the Enron scandal and more recently from the drive to implement global standards In a key regulatory change a company audit committee is now expected to play a significant role in agreeing the contents of the financial statements and overseeing the activities of the auditors Finance Directors Audit Committee Chairs and Audit Engagement Partners are required to discuss and negotiate financial reporting and auditing issues a significant process leading to the agreement of the published numbers and disclosures and to the issuing of the auditor s report which accompanies them but which is entirely unobservable by third parties Reaching Key Financial Reporting Decisions How Directors and Auditors Interact is a fascinating behind the scenes examination of this closed process The authors draw on the results of face to face interviews and an extensive survey of finance directors audit committee chairs and audit partners and present nine company case studies highlighting the process of discussion and negotiation and the methods by which the agreed financial reporting outcome was reached Detailed analysis of the case studies Allows those involved in the process to benchmark their behaviours against those of others Enables a comparison between the previous and current regulatory environments to see what has changed and sheds light on the sorts of behaviours the current regulatory framework encourages Evaluates the effectiveness of the changed regulatory regime providing evidence relevant to current policy debates concerning the value of audit IFRS and the relative merit of rules based versus principles based accounting standards in relation to professional judgement and compliance The unprecedented access and unique insights offered by this book make it invaluable for audit firm staff and partners audit committee chairs and company directors involved in agreeing the published financial statements as well as those who have an interest in the financial statements but do not have access to the negotiation process
