Halbband+Registerband* Ernst Eichler,Gerold Hilty,Heinrich Löffler,Hugo Steger,Ladislav Zgusta,2008-07-14 All known languages of the world have special lexical units called names or proper names whose purpose is to designate the individuality of single persons groups of people families places hills mountains rivers and animals as well as things and institutions etc The study of names also called onomastics or onomatology is not simply a subdiscipline of linguistics several other disciplines besides traditional philology cooperate in the study The universe of names as objects of research lacks any clear cut limits The interest in names can be linguistic or philosophical historical or contemporary theoretical or practical legal or political ethnographic or religious and in each of these and other cases interest can concentrate on a single language a group of languages or a family of them The present volume is the work of more than 250 authors from 42 countries This fact alone shows how widespread the studies are The three languages used in the volume English French German give only a partial impression of the supranational and transcultural character of the names and their studies Among the main areas on which the volume concentrates are the following Specifities of names as linguistic signs and their systematic analysis Idiosyncrasies of name studies in various countries in the past and present The multiplicity of names and their properties in as many languages as was practical Demonstration of the basic functional identity yet endless formal variety of names as identifiers of individual entities The phenomena of change and assimilation that occur in contact between two or more

languages The importance of names in disciplines other than linguistics such as history law philosophy theology geography archeology and many others Names and their use in connection and interaction with other areas of human activities in society Numerous case studies showing the variety of approaches and methods that must be applied if microanalyses of sets of data are to be used for important conclusions Registers of names belonging to more than 50 languages of the world which should make accessible this whole plethora of material and ideas through their articulation topical onomatological etc and the arrangement of material 23 chapters which are systematically ordered according to specific characteristics of names and their study *Creation and Tradition in Language* J. Peter Maher,1977-01-01 Interest in word meaning is on the increase among mainstream linguists again after a half century of neglect During this interval progress in phonology and syntax was great but further progress in these sub disciplines will remain blocked until it is recognized that the prime functional unit of speech is the word that the central problem of language theory is lexis Word meaning is typically complicated by changes across time for a theory of language creativity these effects must be discerned from spontaneous creation The articles brought together in this volume attempt to illuminate on the basis of particular lexical studies the dynamics of perception and word meaning of language and mind No further volumes appeared **Bibliography of Bibliographies of the Languages of the World** ,1990-01-01 This is Volume I of a monumental two volume work a historical record and guide to bibliographic efforts on all the languages of the world which is designed to serve the professional as well as non professional reader as a first point of entry for information about any language By consulting the Bibliography the reader will quickly be able to identify specific bibliographic sources for particular topics of interest and thus rapidly begin to narrow the search for information Although bibliographies of bibliographies have appeared for a few language families this set provides for the first time a comprehensive compilation of bibliographies for all of the languages or language families of the world from the earliest period through 1985 Volume I with nearly 2500 entries in 400 pages covers the Indo European languages of Europe plus Etruscan and Basque as well as general and multi language references including sections on dictionaries dissertations and specialized topics Volume II with approximately the same number of entries will cover all other languages In the Bibliography most entries are annotated to indicate the number of items in each bibliography and how they are arranged some information on the scope and coverage of the work where not obvious from the title whether items are annotated and what indexes are included The Bibliography will long stand as an indispensable reference tool and should be in every library serving readers interested in any aspect of language *Personal Names and Naming from an Anthropological-Linguistic Perspective* Sambulo Ndlovu,2023-08-07 This book fills a gap in the literature as it uniquely approaches onomastics from the perspective of both anthropology and linguistics It addresses names and cultures from 16 countries and five continents thus offering readers an opportunity to comprehend and compare names and naming practices across cultures The chapters presented in this book explore the cultural significance of personal names naming ceremonies conventions and practices

They illustrate how these names and practices perform certain culture specific functions such as religion identity and social activity Some chapters address the socio political significance of personal names and their expression of self and otherness The book also links the linguistic structure of personal names to culture by looking at their morphology syntax and semantics It is divided into four sections Section 1 demonstrates how personal names perform human culture Section 2 focuses on how personal names index socio political transitioning Section 3 demonstrates religious values in personal names and naming and Section 4 links linguistic structure and analysis of personal names to culture and heritage **Concise History of the Language Sciences** E.F.K.
