*Performance Assessment of Urban Infrastructure Services* Enrique Cabrera Jr, Miguel Angel Pardo, 2008-03-01

Performance assessment has been one of the hottest topics in the water industry in the past decade. In that period, the International Water Association has played a key role, and the performance indicators systems developed for drinking water and wastewater utilities have become a reference worldwide. This book represents a collection of the papers presented to the Pi08 Conference in Valencia, Spain, March 2008. The conference represents the final stage in the COST C18 Action funded by the EU and brings together some of the most relevant professionals in the water industry. The book covers the latest trends in performance assessment as well as relevant case studies from practical applications in utilities around the globe. Themes: Performance Indicators, Metric Benchmarking, Process Benchmarking, Asset Management, Regulation, Case Studies.

M. Baptista, Enrique Cabrera Jr, Francisco Cubillo, Patricia Duarte, Wolfram Hirner, Wolf Merkel, Renato Parena, 2006-06-30. The IWA Performance Indicator System for water services is now recognized as a worldwide reference. Since its first appearance in 2000, the system has been widely quoted, adapted, and used in a large number of projects, both for internal performance assessment and metric benchmarking. Water professionals have benefited from a coherent and flexible system with precise and detailed definitions that in many cases have become a standard. The system has proven to be adaptable, and it has been used in very different contexts for diverse purposes. The Performance Indicators System can be used in any organization, regardless of its size, nature, public/private, etc., or degree of complexity and development. The second edition of *Performance Indicators for Water Supply Services* represents a further improvement of the original manual. It contains a reviewed and consolidated version of the indicators resulting from the real needs of water companies worldwide that were

expressed during the extensive field testing of the original system The indicators now properly cover bulk distribution and the needs of developing countries and all definitions have been thoroughly revised The confidence grading scheme has been simplified and the procedure to assess the results uncertainty has been significantly enhanced In addition to the updated contents of the original edition a large part of the manual is now devoted to the practical application of the system Complete with simplified step by step implementation procedures and case studies the manual provides guidelines on how to adapt the IWA concepts and indicators to specific contexts and objectives The manual includes a new version of the software Sigma Lite incorporating all the new developments and an improved graphical user interface This new edition of Performance Indicators for Water Supply Services will be an invaluable reference source for all those concerned with managing the performance of the water supply industry including those in the water utilities as well as regulators policy makers and financial agencies

Critically assessing meanings of the term public this book situates the emergence and expansion of public services within market based forms of production and consumption It highlights the potential for making public services more progressive within market societies but underscores their ongoing capture by private interests and emphasises the inherent limits of reform within a bourgeois public sphere The author explores opportunities for more expansive forms of non marketized public services examining emerging debates on the theory and practice of equitable participatory and sustainable forms of publicness that go beyond mere ownership The book then asks how we can build a robust international pro public movement that juggles universal needs with local context With a focus on essential public services such as water electricity and health the text is global in its scope and written for a broad audience It will be useful for those interested in social and public policy
