from Flags in the Dust through to Absalom Absalom to a searching reappraisal under the spotlight of a media historical inquiry It proposes that Faulkner's inveterate attraction to the paradigms of romance was disciplined and masked by the recurrent use of metaphorical figures borrowed from the new media ecology Faulkner dressed up his romance materials in the technological garb of radio gramophony photography and cinema along with the transportational networks of road and air that were being installed in the 1920s His modernism emerges from a fraght but productive interplay between his anachronistic predilection for chivalric chich's and his extraordinarily knowledgeable interest in the most up to date media institutions and forms Rather than see Faulkner as a divided author who worked for money in the magazines and studios while producing his serious fiction in despite of their symbolic economies this study demonstrates how profoundly his mature art was shot through with the figures and dynamics of the materials he publicly repudiated The result is a richer and more The Routledge Handbook of Transport Economics Jonathan nuanced understanding of the dialectics of his art Cowie, Stephen Ison, 2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation understand that and you alleviate the problem Featuring contributions from world leading scholars and practitioners from across the globe all of the chapters within this book are written from a practical perspective theory is applied and developed using real world examples The book examines concepts issues ideas and practicalities of transport provision in five key topic areas public transport public transport reform economic development and transport modelling transport and the environment freight transport A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living Practical and insightful this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning appraisal regulation and freight and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation World War II and the Postwar Years in America William H. Young, Nancy K. Young, 2010-09-17 More than 150 articles provide a revealing look at one of the most tempestuous decades in recent American history describing the everyday activities of Americans as they dealt first with war and then a difficult transition to peace and prosperity The two volume World War II and the Postwar Years in America A Historical and Cultural Encyclopedia contains over 175 articles describing everyday life on the American home front during World War II and the immediate postwar years Unlike publications about this period that focus mainly on

the big picture of the war and subsequent economic conditions this encyclopedia drills down to the popular culture of the 1940s bringing the details of the lives of ordinary men women and children alive The work covers a broad range of everyday activities throughout the 1940s including movies radio programming music the birth of commercial television advertising art bestsellers and other equally intriguing topics The decade was divided almost evenly between war 1940 1945 and peace 1946 1950 and the articles point up the continuities and differences between these two periods Filled with evocative photographs this unique encyclopedia will serve as an excellent resource for those seeking an overview of life in the United States during a decade that helped shape the modern world The Ecology of Transportation: Managing Mobility for the Environment John Davenport, Julia L. Davenport, 2006-06-30 Human transport by land sea and air has increased exponentially through time in intensity paralleling rises in population prosperity and rates of technological change Transport has considerable ecological effects many of them detrimental to environmental sustainability This volume brings together international experts from a variety of disciplines to review the ecological effects and their causes in terms of road rail ship and aircraft transport The contributors have different attitudes and agendas Some are ecologists some planners others social scientists Focus ranges from identification of threats and amelioration of damaging effects through to future design of transport systems to minimize environmental degradation Some chapters consider restricted areas of the globe others the globe itself Views encompass Dark Star Matthew H. Hersch, 2023-12-26 A captivating history of NASA's Space deep pessimism and cautious optimism Transportation System the space shuttle chronicling the inevitable failures of a doomed design In Dark Star Matthew Hersch challenges the existing narrative of the most significant human space program of the last 50 years NASA's space shuttle He begins with the origins of the space shuttle a century long effort to develop a low cost reusable rocket powered airplane to militarize and commercialize space travel which Hersch explains was built the wrong way at the wrong time and for all the wrong reasons Describing the unique circumstances that led to the space shuttle's creation by President Richard Nixon's administration in 1972 and its subsequent flights from 1981 through 2011 Hersch illustrates how the space shuttle was doomed from the start While most historians have accepted the view that the space shuttle s fatal accidents including the 1986 Challenger explosion resulted from deficiencies in NASA's management culture that lulled engineers into a false confidence in the craft Dark Star reveals the widespread understanding that the shuttle was predestined for failure as a technology demonstrator The vehicle was intended only to give the United States the appearance of a viable human spaceflight program until funds became available to eliminate its obvious flaws Hersch's work seeks to answer the perilous questions of technological choice that confront every generation and it is a critical read for anyone interested in how we can create a better world through the things we build Rising to the Challenge National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's position as the source of much of the world's global innovation has been

the foundation of its economic vitality and military power in the post war No longer is U S pre eminence assured as a place to turn laboratory discoveries into new commercial products companies industries and high paying jobs As the pillars of the U S innovation system erode through wavering financial and policy support the rest of the world is racing to improve its capacity to generate new technologies and products attract and grow existing industries and build positions in the high technology industries of tomorrow Rising to the Challenge U S Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security its role as a world power and the welfare of its people The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage To this end both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States This report argues that far more vigorous attention be paid to capturing the outputs of innovation the commercial products the industries and particularly high quality jobs to restore full employment America's economic and national security future depends on our succeeding in this endeavor American Military Aviation Charles Joseph Gross, 2002 Discusses major developments in aircraft doctrine training and operations The author also provides discussions of airlife in flight refueling military budgets industry and inter service squabbling He deftly sketches the evolution of the air arms of each of the different services and provides clear analysis of military budgets William H. Young, 2002-10-30 Most historical studies bury us in wars and politics paying scant attention to the everyday effects of pop culture Welcome to America's other history the arts activities common items and popular opinions that profoundly impacted our national way of life The twelve narrative chapters in this volume provide a textured look at everyday life youth and the many different sides of American culture during the 1930s Additional resources include a cost comparison of common goods and services a timeline of important events notes arranged by chapter an extensive bibliography for further reading and a subject index The dark cloud of the Depression shadowed most Americans lives during the 1930s Books movies songs and stories of the 1930s gave Americans something to hope for by depicting a world of luxury and money Major figures of the age included Fred Astaire and Ginger Rogers Irving Berlin Amelia Earhart Duke Ellington the Marx Brothers Margaret Mitchell Cole Porter Joe Louis Babe Ruth Shirley Temple and Frank Lloyd Wright Innovations in technology and travel hinted at a Utopian society just off the horizon group sports and activities gave the unemployed masses ways to spend their days and a powerful new demographic the American teenager suddenly found itself courted by advertisers and entertainers
