The Last Man Who Knew Everything Andrew Robinson, 2023-05-09 No one has given the polymath Thomas Young 1773 1829 the all round examination he so richly deserves until now Celebrated biographer Andrew Robinson portrays a man who

solved mystery after mystery in the face of ridicule and rejection and never sought fame As a physicist Young challenged the theories of Isaac Newton and proved that light is a wave As a physician he showed how the eye focuses and proposed the three colour theory of vision only confirmed a century and a half later As an Egyptologist he made crucial contributions to deciphering the Rosetta Stone It is hard to grasp how much Young knew This biography is the fascinating story of a driven yet modest hero who cared less about what others thought of him than for the joys of an unbridled pursuit of knowledge with a new foreword by Martin Rees and a new postscript discussing polymathy in the two centuries since the time of Young It returns this neglected genius to his proper position in the pantheon of great scientific thinkers **Ancient Scripts** Grace

Andrew Robinson, 2012-01-02 First discovered in 1900 on clay tablets among the ruins of the Palace of Minos at Knossos Crete Linear B script remained a mystery for over fifty years until 1952 when Michael Ventris discovered that its signs did not represent an unknown language as previously believed but an archaic dialect of Greek more than 500 years older than the Greek of Homer This book tells the life story of Michael Ventris an intriguing and contradictory man a gifted linguist but a divided soul together with that of his remarkable decipherment of Linear B Dubbed the Everest of archaeology the decipherment was all the more remarkable because Ventris was not a trained classical scholar but an architect who had first heard of Linear B as a schoolboy An initial fascination became a lifelong obsession *House of Faith House of Cards* Eric N. Davis, 2010-05-21 Concise Vivid Honest Dan Barker critically acclaimed author of *Godless* and *Losing Faith in Faith* Brutally honest insightful and compelling storytelling Lyndon Lamborn author of *Standing for Something More* When a young couple searched for clues connecting them to a famous ancestor their journey led them on a path they never expected converting to Mormonism *House of Faith House of Cards* tells the turbulent life story of their son Eric including all the typical Mormon experiences and some extraordinary episodes no Mormon will ever encounter He participated with family members in his first secret temple ritual normally reserved for adults at the age of four only to be excluded from a similar ceremony involving his family thirteen years later In 1857 a company of 120 immigrants set out from a small Arkansas town toward California In a tragic twist of fate they never reached their destination While encamped in southern Utah local Mormons and Paiute Indians launched an ambush brutally slaughtering the group in what became known as the Mountain Meadows massacre 125 years later Eric would be raised as a Mormon in the same Arkansas community where this wagon train initially departed There he learned just how much some people still despised that faith While training for and serving a church mission in Canada in the mid 1990s Eric shared a room and became acquainted with a fellow missionary named Mark Hacking Less than a decade later when the disappearance and murder of Hacking's wife became highly publicized several international media outlets approached Eric searching for any juicy detail of the man's troubled past These stories are just the tip of the iceberg [Translating Maya Hieroglyphs](#) Scott A.J. Johnson, 2013-06-24 Maya hieroglyphic writing may seem impossibly opaque to beginning students but scholar Scott A.J. Johnson presents it as a regular and comprehensible system in this engaging easy to follow textbook The only comprehensive introduction designed specifically for those new to the study *Translating Maya Hieroglyphs* uses a hands on approach to teach learners the current state of Maya epigraphy Johnson shows readers step by step how to translate ancient Maya glyphs He begins by describing how to break down a Mayan text into individual glyphs in the correct reading order and then explains the different types of glyphs and how they function in the script Finally he shows how to systematically convert a Mayan inscription into modern English Not simply a reference volume *Translating Maya Hieroglyphs* is pedagogically arranged so that it functions as an introductory foreign language textbook Chapters cover key topics including spelling dates and numbers basic grammar and verbs Formal linguistic

information is accessibly explained while worksheets and exercises complement and reinforce the material covered in the text. Glyph blocks and phrases drawn from actual monuments illustrate the variety and scribal virtuosity of Maya writing. The Maya writing system has not been fully deciphered. Throughout the text, Johnson outlines and explains the outstanding disputes among Mayanists. At the end of each chapter, he offers sources for further reading. Helpful appendices provide quick reference to vocabulary, glyph meanings, and calendrical data for students undertaking a translation. The study of Maya glyphs has long been an arcane subject known only to a few specialists. This book will change that. Taking advantage of the great strides scholars have made in deciphering hieroglyphs in the past four decades, *Translating Maya Hieroglyphs* brings this knowledge to a broader audience, including archaeologists and budding epigraphers. Corpus linguistics

Stefanowitsch, Anatol, 2020. Corpora are used widely in linguistics but not always wisely. This book attempts to frame corpus linguistics systematically as a variant of the observational method. The first part introduces the reader to the general methodological discussions surrounding corpus data, as well as the practice of doing corpus linguistics, including issues such as the scientific research cycle, research design, extraction of corpus data, and statistical evaluation. The second part consists of a number of case studies from the main areas of corpus linguistics: lexical associations, morphology, grammar, text, and metaphor, surveying the range of issues studied in corpus linguistics while at the same time showing how they fit into the methodology outlined in the first part. The Gestural Origin of Language

David F. Armstrong, Sherman Wilcox, 2007. This is a unique view of the origins of language, describing what linguistic science would look like if sign language rather than speech was used as the basis for the study of language systems. *Queequeg's Coffin*

Birgit Brander Rasmussen, 2012-01-06. Rather than seeing American literature as beginning with the writings of English or Spanish colonists, Brander Rasmussen points to the wide variety of indigenous writing in the Americas prior to colonization. The study looks at writing between 1524 and the mid-19th century work of Herman Melville. **Cracking the Egyptian Code**

Andrew Robinson, 2013-04-08. The Rosetta Stone, uncovered in 1799 by Napoleon's army, recorded its inscription in three scripts: ancient Greek, Coptic, and hieroglyphic. It would provide scholars with the first clues to unlocking the secrets of Egyptian hieroglyphs, a language lost for nearly two millennia. More than twenty years later, a remarkably gifted Frenchman, Jean-François Champollion, successfully deciphered the hieroglyphs, sparking a revolution in our knowledge of ancient Egypt. *Cracking the Egyptian Code* is the first biography in English of Champollion, widely regarded as the founder of Egyptology. Andrew Robinson meticulously reconstructs how Champollion cracked the code of the hieroglyphic script, describing how Champollion started with Egyptian obelisks in Rome and papyri in European collections, sailed the Nile for a year, studied the tombs in the Valley of the Kings, a name he first coined, and carefully compared the three scripts on the Rosetta Stone to penetrate the mystery of the hieroglyphic text. Robinson also brings to life the rivalry between Champollion and the English scientist Thomas Young, who claimed credit for launching the decipherment, which Champollion hotly denied. There is much more to Champollion's life.

than the Rosetta Stone and Robinson gives equal weight to the many roles he played in his tragically brief life from a teenage professor in Revolutionary France to a supporter of Napoleon whom he met in exile and a curator at the Louvre Extensively illustrated *Cracking the Egyptian Code* will appeal to anyone interested in Egypt decipherment and code breaking and Napoleon and the French Revolution *Digital Performance* Steve Dixon, 2015-01-30 The historical roots key practitioners and artistic theoretical and technological trends in the incorporation of new media into the performing arts The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts Digital media has been increasingly incorporated into live theater and dance and new forms of interactive performance have emerged in participatory installations on CD ROM and on the Web In *Digital Performance* Steve Dixon traces the evolution of these practices presents detailed accounts of key practitioners and performances and analyzes the theoretical artistic and technological contexts of this form of new media art Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the deus ex machina of classical Greek drama to Wagner's Gesamtkunstwerk concept of the total artwork and draws parallels between contemporary work and the theories and practices of Constructivism Dada Surrealism Expressionism Futurism and multimedia pioneers of the twentieth century For a theoretical perspective on digital performance Dixon draws on the work of Philip Auslander Walter Benjamin Roland Barthes Jean Baudrillard and others To document and analyze contemporary digital performance practice Dixon considers changes in the representation of the body space and time He considers virtual bodies avatars and digital doubles as well as performances by artists including Stelarc Robert Lepage Merce Cunningham Laurie Anderson Blast Theory and Eduardo Kac He investigates new media's novel approaches to creating theatrical spectacle including virtual reality and robot performance work telematic performances in which remote locations are linked in real time Webcams and online drama communities and considers the extratemporal illusion created by some technological theater works Finally he defines categories of interactivity from navigational to participatory and collaborative Dixon challenges dominant theoretical approaches to digital performance including what he calls postmodernism's denial of the new and offers a series of boldly original arguments in their place **Writing and**

Richard Leo Enos, 2008-10-17 Greek and Roman traditions dominate classical rhetoric Conventional historical accounts characterize Roman rhetoric as an appropriation and modification of Greek rhetoric particularly the rhetoric that flourished in fifth and fourth centuries BCE Athens However the origins nature and endurance of this Greco Roman relationship have not been thoroughly explained Roman Rhetoric Revolution and the Greek Influence reveals that while Romans did benefit from Athenian rhetoric their own rhetoric was also influenced by later Greek and non Hellenic cultures particularly the Etruscan civilization that held hegemony over all of Italy for hundreds of years before Rome came to power *New Scientist*
