Agrarian Change and Crisis in Europe, 1200-1500 Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle

Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region

Disgorgement of Profits Ewoud Hondius, André Janssen, 2015-08-12 Disgorgement of profits is not exactly a household word in private law Particularly in civil law jurisdictions as opposed to those of the common law the notion is not well known What does it stand for It is best illustrated by examples One of the best known being the British case of *Blake v Attorney General* 2001 1 AC 268 In which a double spy had been imprisoned by the UK government before escaping and settling in the former Soviet Union While there wrote a book on his experiences upon which the UK government claimed the proceeds of the book The House of Lords as it then was allowed the claim on the basis of Blake's breach of his employment contract Other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense In such cases the question arises whether the infringing party should be disgorged of his profits This volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law It does not purport to answer the question whether or not such damages should or should not be awarded It does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions

The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in

the telecommunications sector Major factors hampering efficient competition regulation include Uganda's sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets

The Pursuit of Happiness in a More Perfect Union Robert G. Bill, 2016-11-07 The conflict between conservatives and liberals over public economic policy appears to have become a permanent feature of the American political landscape Conservatives seek economic solutions with the market as virtually the sole organizing economic principle invoking individualism inspired by the Declaration of Independence's right to the pursuit of happiness Liberals look to an important economic role for a federal government established by the Constitution to promote the general welfare In addition to the disagreement among the political class there is also no agreement among economists with no model reliably predicting the economic crises of recent decades Under these circumstances the author believes individualism and the concern for the common good may only be reconciled through policies which promote equality of opportunity or as Abraham Lincoln expressed it equal privileges in the race of life with all its desirable human aspirations The reconciliation of individualism and the common good is developed through reviews of the meaning of liberty happiness and their economic implications The historical performance of the American economy is described in the context of the evolution of American federal government from one of limited economic scope supporting laissez faire capitalism to the current mixed government The more expansive role of government is described in terms of taxation policy and spending including concerns over the national debt and its significance With this background the general reader is invited to follow the author's path to a policy of equality of opportunity with specific proposals for an end to poverty assistance to children assistance to postsecondary education and training and commitments to social and medical security A specific taxation policy is proposed to fund these programs while maintaining a prudent and manageable national debt Associated with these proposals are reforms to make the federal government more representative of the people

Legal and Political Foundations of Capitalism Jamee K. Moudud, 2025-03-19 Institutions matter is a common refrain among all economists including many who have proposed progressive alternatives to free market fundamentalism However this sentiment does not go far enough This book draws principally on the Original Institutional Economics and American Legal Realist traditions to propose a theory of legal institutionalism or institutional political economy By arguing that society is a political community it challenges the private law versus public law or state versus markets distinction Focusing on property money and credit constitutional law and corporations this book argues that laissez faire has never existed and that state intervention versus de regulation and market failures versus free markets are false dichotomies This book proposes the need to engage with legal economic theory and history to understand what institutions are what economic

regulation means law's intrinsic connection to the economy and the distribution of power relations within capitalism. This book will be of interest to readers of economics, law, public policy, international and development studies, and all those seeking to explore progressive alternatives in this period of multiple crises.
