**Making Societies** William G. Roy, 2001-01-23 The only book written for undergraduates about the social construction of reality that is also historical and comparative In addition it includes chapters on the social construction of time and space as well as the more traditional chapters on race class and gender This book shows how these social constructions of time space race gender and class intersect with each other to produce particular social phenomena that are enduring and significant for our society No other book for undergraduate teaching has ever done this this is a real first If the goal of this series is to broaden the students vision no book is more ambitious toward attaining that goal than Making Societies Roy helps students question the most natural of categories time space gender race and class Leading them through examples drawn from around the world he shows how these categories are social constructions historically formed ideologically loaded and subject to change This may be profoundly unsettling for students will be encouraged to question not only what they know but also the conceptual frameworks they use when they claim to understand anything As Series Editors it is our belief that this provocation will open new ways of thinking about the social world how it is and how it might be Wendy Griswold Series Editor Northwestern University from the foreword I love the organizing concept of the social construction of reality and using a cross cultural historical comparative approach to analyzing key themes space time race gender and class I particularly like the focus on space and time first because it illustrates how deeply embedded the social construction of reality is Joanne Defiore University of Washington Bothel The book is intellectually strong it is driven by ideas and engages important processes of social life Lisa Brush University of Pittsburgh Contributor to the SAGE Teaching Innovations and Professional Development Award

**Making Societies** William G. Roy, 2001-01-23 This book shows how the social constructions of time space race gender and class intersect with each other to produce particular social phenomena that are enduring and significant for our society Leading the reader through examples drawn from around the world the author shows how these categories are social constructions historically formed ideologically loaded and subject to change

**How Societies Change** Daniel Chirot, 2011-05-27 How have societies changed over the past 5 000 years Welcome to the brief manageable macro sociology text that takes your students on a journey to answer this question This book the only brief and affordable macro sociology text available for undergraduates describes how societies have changed over the past five thousand years The discussion focuses on the idea that industrial societies despite their great success have created a new set of recurring and unsolved problems which will serve as a major impetus for further social change This book explores development through historical narrative and examines the globalization development paradox through in depth case studies

**Sociological Theory** Bert N. Adams, R. A. Sydie, 2001-01-30 This book connects theorists and their work to larger themes and ideas All too often in the opinion of the authors theory texts focus too much on individual theorists and insufficiently on the relationship between their theories and how these have contributed in turn to the evolution of ideas concerning social life

Treatment of individual theories and theorists is balanced with the development of key themes ideas about social life introduced in Chapter 1 which then reappear in the discussion of individual theorists and their work A key organizing principle of this text is to trace major schools of thought over the past 150 years as they appear and reappear in different chapters Section 1 introductions help remind students of the big picture within which any given theory or theorist is only one part A consistent organization and presentation within chapters helps provide students with a context for learning and a means of much more easily comparing and contrasting theorists and their ideas Important new voices in a text for social theory In Chapter 2 Harriet Martineau is introduced as one of sociology s founders From then on the views of women theorists and others are represented in far more than token fashion Examples include W E B DuBois Marianne Weber Charlotte Gilman Rosa Luxemburg Joseph Schumpeter V I Lenin Niklas Luhmann Theda Skocpol Erik Wright Elman Service Arlie Hochschild Dorothy Smith Patricia Hill Collins and Immanuel Wallerstein A timeline showing when social theorists lived and wrote and connecting their biographies to important social events over 300 years is at the back of the text The organization of every chapter along similar lines provides a consistency in presentation that encourages comparisons among the theorists The authors do a very good job presenting overlooked theorists and making their relevance to social theorizing doing sociology clear Joan Alway formerly University of Miami The strengths of this text are the breadth of theories covered the integration of gender related topics family work religion the use of substantial quotes from primary texts the consistent inclusion of methodological issues and the goals of the project to provide an expansive and readable theory text I have no doubt that it will find a solid position in the field of popular theory texts for undergraduate course use Kathleen Slobin North Dakota State University

**Constructing Social Research** Charles C. Ragin, 1994 Ideal for capstone courses in undergraduate social science or as an invitation to social research this innovative short text shows what is common across three major traditions qualitative research on commonalities comparative research on diversity and quantitative research on relationships among variables These three strategies provide a solid foundation for the study of all social phenomena from the examination of the complexities of everyday life to the investigation of the power of transnational processes

**White on Arrival** Thomas A. Guglielmo, 2004-09-30 Taking the mass Italian immigration of the late 19th century as his starting point and drawing on dozens of oral histories and a diverse array of primary sources in English and Italian Guglielmo focuses on how perceptions of Italians race and color were shaped in one of America s great centers of immigration and labor Chicago His account skillfully weaves together the major events of Chicago immigrant history the Chicago Color Riot of 1919 the rise of Italian organized crime and the rise of industrial unionism with national and international events such as the rise of fascism and the Italian Ethiopian War of 1935 36 to present the story of how Italians approached learned and lived race By tracking their evolving position in the city s racial hierarchy Guglielmo reveals the impact of racial classification both formal and informal on immigrants abilities to acquire homes and jobs start families and gain opportunities in America White on

Mullins, 2013-01-11 This book is about the meanings of masculinities within the social networks of the streets of an American city St Louis Missouri and how these shaped perceptions and enactments of violence Based on a large number of interviews with offenders the author provides a rich description of life on the streets contextualizing criminal violence within this deviant subculture and with a specific focus on issues of gender The book provides one of the most detailed descriptions yet of the forms masculinity takes in disadvantaged communities in the United States It establishes how street based gender

identity motivated and guided men through violent encounters exploring how men's relationships with women and their families instigated violence One key issue addressed is why men resorted to violence in certain situations and not in others exploring the range of choices open to them and how these opportunities were interpreted The book makes a major contribution to the study of the relationship between masculinities and violence making use of a much larger sample than elsewhere

The Undevelopment of Capitalism Rebecca Jean Emigh, 2009 In The Undevelopment of Capitalism Emigh argues that the expansion of the Florentine economic market in the fifteenth century helped to undo the development of markets of other economies especially the rural economy of Tuscany As this highly developed urban market penetrated rural regions it actually erased rural market institutions that rural inhabitants had used to organize agricultural production and family life Thus an advanced economy at the time of the late Middle Ages and early Renaissance undeveloped over time The economic development of this region in Italy was delayed

as it failed to keep pace with the rest of Europe Using a negative case methodology to show how urban and rural markets change Emigh employs methods of historical sociology and sectoral theories to examine how markets can prosper and suffer at the same time She shows how sectoral relations are crucial to transitions to capitalism and how capitalist development can also contract markets

**Settler Colonialism, Race, and the Law** Natsu Taylor Saito, 2020-03-10 2021 Outstanding Academic Title Choice Magazine How taking Indigenous sovereignty seriously can help dismantle the structural racism encountered by other people of color in the United States Settler Colonialism Race and the Law provides a timely analysis of structural racism at the intersection of law and colonialism Noting the grim racial realities still confronting communities of color and how they have not been alleviated by constitutional guarantees of equal protection this book suggests that settler colonial theory provides a more coherent understanding of what causes and what can help remediate racial disparities Natsu Taylor Saito attributes the origins and persistence of racialized inequities in the United States to the prerogatives asserted by its predominantly Angloamerican colonizers to appropriate Indigenous lands and resources to profit from the labor of voluntary and involuntary migrants and to ensure that all people of color remain in their place By providing a functional analysis that links disparate forms of oppression this book makes the case for the oft cited proposition that racial justice is indivisible focusing particularly on the importance of acknowledging and contesting the continued colonization of Indigenous peoples and lands Settler Colonialism Race and the Law concludes that rather than relying on promises of formal equality we will more effectively dismantle structural racism in America by envisioning what the right of all peoples to self determination means in a settler colonial state
