Managerial Economics 12th Edition By:

Managerial Economics S. Charles Maurice, Christopher R. Thomas, 2015-09-22 The goal of Thomas and Maurice's *Managerial Economics* is to teach students the economic way of thinking about business decision and strategy. This edition continues to develop critical thinking skills and provides students with a logical way of analysing both the routine decisions of managing the daily operations of a business as well as the longer run strategic plans that seek to manipulate the actions and reactions of rival firms. *Managerial Economics* is a self-contained textbook that requires no previous training in economics. While maintaining a rigorous style, this book is designed to be one of the most accessible books in managerial economics from which to teach and learn because of its clarity of presentation and strong end-of-chapter problems. Rather than parading students quickly through every interesting or new topic in microeconomics and industrial organization, this 12th edition instead carefully develops and applies the most useful concepts for business decision making and strategic planning.

Managerial Economics: Applications, Strategy and Tactics James R. McGuigan, R. Charles Moyer, Frederick H. deB. Harris, 2010-08-03 Packed with managerially oriented applications, *MANAGERIAL ECONOMICS* 12th edition illustrates how managers apply theories and techniques to solve real-world problems while teaching future business leaders how to think analytically and make better decisions. Extremely user-friendly, the text caters to a variety of learning styles as it presents key analytical concepts in several ways including tabular analysis, graphical analysis, and algebraic analysis. Students learn in a format with which they are comfortable, making difficult material more accessible and easier to understand. The new 12th edition is concise, current, and cutting-edge, with an exciting and extremely relevant new focus on green businesses and business developments in the examples and applications. The seasoned author team balances traditional neoclassical micro theory with extensive coverage of the latest analytical tools in managerial economics, such as game-theoretic tactics, information economics, and organizational architecture. Television Production in Transition Gillian Doyle, Richard Paterson, Kenny Barr, 2021-05-03 Focusing on the growing power of transnational media corporations in an increasingly globalized environment for distribution of television content and on the effects of mergers and acquisitions involving local and independent television production companies, this book examines how current and recent restructurings in ownership across the television industry reflect changing business models, how they affect creativity and diversity of television output, and to what extent they call for new approaches to regulation and policy. Based on a major study of the UK production sector as a case study, it offers a unique analysis of wider transformations in ownership affecting the television production industry worldwide and of their economic, socio-cultural, and policy implications. **Applied Mechanics, Mechatronics And Intelligent Systems - Proceedings Of The 2015**
