

## Step-by-Step Instructions for self-injection

1. Wash and dry your hands thoroughly.

2. Sit or lie in a comfortable position, so that you can see your abdomen.

3. Choose an area on the right or left side of your abdomen, at least 2 inches from your belly button. Think "love handles."

4. Clean the injection site with alcohol swab. Let dry.

5. Remove needle cap by pulling it straight off the syringe and discard in sharps collector.

6. Hold syringe like a pencil in your writing hand.

7. With other hand, pinch an inch of the cleansed area to make a fold in skin. Insert full length of needle straight down — at a 90° angle — into the fold of skin.

8. Press plunger with your thumb until syringe is empty.

9. Pull needle straight out at the same angle that it was inserted, and release skin fold.

10. Point needle down and away from yourself and others, and push down on plunger to activate safety shield.

11. Place used syringe in sharps collector.
