MANAGEMENT IN THE ?GAMA-S Dr. Deepa Duraiswamy, 2021-02-21 For at least 1500 years temple design construction and worship have followed the canon of the gama's Shouldn't temple management also follow the gama's Steeped in a history of more than two millennia the real bequest of India's ancient temples is that they are still living sacred spaces The gods that were invoked in these temples more than a thousand years ago continue to reside in the sanctums and gaze benevolently upon their devotees The bells ring for morning service as they did a thousand years ago The c rya waves the rati just as another c rya did a thousand years ago No other organization in the world can boast of such amazing continuity The secret to this longevity lies in the gama's gama's are the traditional canon believed to be as old as the Vedas with detailed manuals on temple building consecration and ritual worship While the world outside the temples a world of kings and kingdoms has

changed temples continue to follow the gama s in letter and spirit in their everyday religious function notwithstanding the many changes in administrative formats By studying the activities of the temple material and manpower required qualifications and roles prescribed for the temple professionals this thesis attempts to reconstruct an gamic temple management framework using the K mik gama as primary text with other gama s secondary literature and inscriptional evidence as required

Leadership, Change and Responsibility Joop Remmé,Stephanie Jones,Beatrice van der Heijden,Silvio De Bono,2008-05-01 This book is written from the authors s teaching experience within MBA programs where the focus has been on the realities of the students and their striving to be better able to succeed in those realities This has lead to the combining of certain issues which present themselves to the manager as dimensions of complex problems Those issues are traditionally discussed within separate academic disciplines in which the authors are well versed which are addressed once the starting point has been found in managerial reality There is a reason why these topics present themselves to the manager in unison they do interact in theory as well as in practical reality Those issues are not just interesting to ponder over but they require solutions and it is especially in the solutions that they have to connect Leadership is an increasingly important subject because of the challenges which require leadership of some sort Those challenges are more often than not characterized by change or the need for change Change can be something that happens to someone or something which is conducted and benefited from the later case is where people show leadership in being on top of the change On top of the change one has to benefit from what is not in change such as the capabilities and competencies that form the building blocks of a new strategy Strategy and operations are increasingly expected both by forces outside of the organisation as well as by forces from within it to act from a sense of responsibility Increasingly various elements in society call for such responsibility while also issues have arisen which involve management in far reaching challenges even to life itself on this planet This closes the circle for this book as those challenges require leadership of a type not common in the past
