Nudging in Management Accounting Susanne Rauscher, Annika Zielke, 2019-10-16
 Susanne Rauscher and Annika Zielke provide an in depth analysis of the relevance of nudging as a potential solution approach for behavioral issues within the area of Management Accounting It challenges whether learnings from already successful applications of nudging especially in the social and political context can be transferred to the corporate environment of management accounting This study contributes to the increasing interest in behavioral economics in the corporate context Its findings have the potential to impact both academic research and practitioners work

Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012
 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use Furthermore we need to know which individual and situational factors influence their usage of heuristics With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners
