Management Information System 4th Edition Jawadekar:

Management Information Systems, Second Edition KELKAR, S. A., Kelkar S. A., 2009-11-23 It is widely recognized that the knowledge of information systems is very much essential in today's business organizations to survive and prosper. This book in its second edition provides students with a conceptual framework to understand information systems. The focus of information systems irrespective of the level of use of information is on producing quality information needed to facilitate decision making. The objective of this book is to capture the material on information systems and organize it around a framework that offers a current and relevant knowledge based on information system by providing just the adequate amount of material in a concise format. The book is organized in three parts: i) Information systems basics, ii) Managing with information, and iii) Managing information resources. Though the main structure of the second edition remains the same, the chapters have been updated and revised as per the recent development in the fields of information technology. Besides this, a new chapter is added to explain the concepts like e-business, Customer relationship management, CRM, Enterprise resources and planning, ERP, and Supply chain management, SCM comprehensively. Intended for the students of computer applications, BCA and MCA and management BBA and MBA and the undergraduate students of Computer Science engineering, the book is equally useful for the busy professionals who wish to grasp the essentials of management information systems without attending a formal instructional course.

Information Systems S. A. Kellar, 2009-11-23 Here is a comprehensive book that serves as a one-stop overview for understanding developing and deploying Information Systems. It aims to provide the students with a conceptual framework to understand Information Systems (IS). The text is written in easy-to-understand language using bullet form style to highlight various points, covers topics the way they are encountered by a typical IS professional. The book is divided into three units: Unit I Information Systems Basics, Unit II Managing with Information, and Unit III Managing Information Resources. Some of the topics discussed enlarge the scope of the book and include e-Commerce and e-Business, CRM, ERP, and SCM Application, Scrap Book, Enterprise and Strategy, Strategy Planning for IS, and Justification for IS. The main body of the text is supplemented with six appendices which can be read on a need-to-know basis. The book is well suited for the undergraduate students of Computer Science and Engineering, Information Technology, postgraduate students of Information Technology and Computer Science, and students pursuing MCA and MBA. Those teaching a course on IS or conducting equivalent training programmes for professionals will also benefit from this text. Finally, the book would be useful for those professionals who wish to grasp the essentials without attending a formal instructional course.
