The Anxiety Epidemic Graham Davey, 2018-11-08 Highly commended at the British Medical Association Book Awards 2019 Are we living in an age of unprecedented anxiety or has this always been a problem throughout history We only need look around us to see anxieties in the family home the workplace on social media and especially in the news It s true that everyone feels anxious at some time in their lives but we re told we re all feeling more anxious than we ve ever been before and for longer than we ve ever done before It s even reported that anxiety is a modern epidemic significant enough to challenge the dominance of depression as the most common mental health problem Much of this increase has been attributed to changes in lifestyles that have led to more stress and pressure being placed on people from childhood to adolescence to adulthood But that s a big claim Going back over the generations how anxious were people in 1968 or 1818 Are people just anxious all the time regardless of what they do or when they lived Is anxiety an inevitable consequence of simply being alive Graham Davey addresses many important questions about the role of anxiety What is it good for What are the unique modern day causes of our anxieties and stresses What turns normal everyday anxiety into the disabling disorders that many of us experience distressing and debilitating conditions such as phobias social anxiety panic disorder obsessive compulsive disorder pathological worrying and post traumatic stress disorder To truly conquer anxiety we need to understand why it has established its prominent place in our modern world
