highly educated and skilled professionals highly skilled immigrants have experienced worsening economic outcomes as reflected in rates of unemployment and falling earnings Part IV considers the internationalization of highly skilled immigration policies focusing on Europe's most important immigration countries Germany and Britain As is true in Canada the labor market outcomes for highly skilled immigrants in Europe are disappointing and the final chapter discusses why this is the case and what might be done to improve matters Given its combination of cross disciplinary insights cross national comparisons and empirical richness the book will be of interest to both scholars and policymakers concerned with immigration policy
