Poker Strategy Kevin Bailey, 2019-10-03 Seventy percent of the poker players lose in the long run Now it depends on you if you see the 70% of the glass empty thinking you could be one of them or you could see the 70% more opportunity to win Because if there are so many people losing someone's got to win too and why not you Thousands of books paper theories and strategies have been published on how to play poker effectively They usually do mathematical calculations and teach you how to react to each hand And all those strategies are as good as showing your cards to your opponents because a strong hand is not about having the strongest cards on the table it is about making the best use of the cards that you have in your hand And that requires skills rather than calculations So before you even delve into the nitty gritty details of poker know that this book will not tell you how to play each hand but rather what to consider before playing each hand It is like the difference between trying to fit into Cinderella's shoes and finding your own fairy godmother This book is your fairy godmother Stop putting other players shoes on This book covers every aspect of playing a poker tournament strategically and effectively From body language to player psychology bidding poker lingo and money management the book provides an in depth analysis of every aspect of the game Whether you are a newbie or a seasoned poker player you will learn a thing or two about winning this game on psychological strategic and monetary levels We discuss the different types of games and how you need to evolve with each player table and variation of the game to keep your opponent's guessing If you have been looking for a complete handbook that takes you through every little detail of the game from the twitch of a lip to the blink of an eye and the strength of your opponent's hands then you can stop your hunt right here What are you waiting for Click the BUY NOW button
