Games and Play in the Theater of Spanish American Women Catherine Larson, 2004 In the seventeen dramatic texts examined in this study women writers from Spanish America have self-consciously incorporated games into their plays structures to highlight from a woman's perspective the idea that life as well as the theatre is a game Some dramas are so overtly about games that the word appears significantly in their titles Others reflect game playing in less direct ways or connect metatheatrical examinations of role playing to the ludic In every drama examined however a game of some sort plays a key role in the construction of the playtext By looking at the nature and number of the games played in these women-authored dramas from the past fifty years we can see the ways in which play is used to effect social control and the connections between play and aggression gender history and politics In these representative dramas the theatre serves as a vehicle for encouraging audiences to think about if not act upon the issues that have shaped Spanish America Games rules winners and losers join together as the playwrights explore events and times of fundamental importance in the
