Gandhi's Popular Sovereignty of Truth Michael

Allen, 2025-07-25 This book offers a philosophical reconstruction of Gandhi's political thought as a form of devotional democracy in which the sovereign people speak the voice of truth as God's voice Part One addresses Gandhi's relationship to the history of modern Western political thought and key thinkers such as Hobbes Locke and Hegel Part Two explores the concept of a Gandhian devotional democracy in relation to contemporary political thought and decidedly illiberal thinkers such as Ivan Ilyin and Curtis Yarvin as well as contemporary trends including populism traditionalism along with important developments like AI superintelligence and interspecies politics The book aims not only to locate Gandhi in the historical context of modern and contemporary political philosophy but to also demonstrate the potential for his political thought to undergo sympathetic and constructive reinterpretation It encourages readers to reassess and rethink the role of soul force as superior to state power as well as a nation's capacity to realize truth devotionally Gandhi's Popular Sovereignty of Truth is essential reading for all scholars researchers and advanced students of political philosophy especially those focussing on the thought of Mahatma Gandhi

global treaties or organizations as enemies of motherhood and apple pie Such polemics distract Americans from what is really at stake in the sovereignty debate the ability of the United States to shape its destiny in a global age The United States cannot successfully manage globalization much less insulate itself from cross border threats on its own As global integration deepens and cross border challenges grow the nation s fate is increasingly tied to that of other countries whose cooperation will be needed to exploit the shared opportunities and mitigate the common risks of interdependence The Sovereignty Wars is intended to help today s policymakers think more clearly about what is actually at stake in the sovereignty debate and to provide some criteria for determining when it is appropriate to make bargains over sovereignty and how to make them
