A Cultural History of Waste Disposal Benjamin A. Lawson, 2024-12-11 This book offers a historical analysis of landfill sites in New York City Greater Toronto and Greater Tel Aviv and uses them as case studies to emphasize the international and global scale of issues concerning waste disposal and park redevelopments New York Toronto and Tel Aviv are currently redeveloping giant landfills into parks to much fanfare The park redevelopments may be seen as

an attempt to erase or assuage the decades of problematic waste disposal policy that led to the creation of such large landfills. Booster rhetoric underscores this point such as promoting how the parks will be a green lung for the city. This book contextualizes these redevelopments by offering a historical analysis providing a greater understanding of the past, current, and future potential issues. It goes on to analyze the language and media coverage surrounding former waste sites becoming park redevelopments, including how cities use art to promote their image and gain cultural relevance. By engaging with both the works of waste historians and literature on waste and discard studies, the book provides theoretical models for analyzing the role of power in municipal systems as well as human and ecological impacts on waste. It concludes with an analysis of the features necessary for landfill parks to be successful. This book will be useful for scholars, researchers, and academics studying waste studies, the environment, cities, and sustainable development, as well as for policymakers and environmental eco-artists.

Perspectives on Waste from the Social Sciences and Humanities Richard Ek, 2020-03-26 Waste is something we encounter on an everyday basis. Today the waste mountain is increasing despite ambitious measures being taken to decrease it. Consequently, increased scholarly interest is being devoted to waste, but primarily from a technocratic and scientific point of view. This compilation offers different perspectives on waste, its characteristics, and its presence in the world from social scientist and humanist standpoints. Waste is the constant companion to the human and is thus inherent in modern society. Therefore, waste needs to be further approached and understood from a plethora of scholarly perspectives and disciplines and further investigated through a multitude of methodologies and data collection techniques. The imagination of a future where waste preventive actions and circular economies permeate society can only be a reality if technocratic and scientific accounts of what is to be done, when, and how are complemented by social, scientific, and humanist concepts of the nature and constitution of waste. Such a perspective offers the possibility to understand how waste is constituted through relationships, language, materials, politics, practices, and structures. This book shows that philosophers, historians, cultural theorists, and economists have much to offer on the topic of

waste as a part of everyday modern life *Trashing the Planet* Stuart A. Kallen, 2017-08-01 On a global scale humans create around 2.6 trillion pounds of waste every year. None of this trash is harmless: landfills and dumps leak toxic chemicals into soil and groundwater while incinerators release toxic gases and particles into the air. What can we do to keep garbage from swallowing up Earth? Reducing, reusing, recycling, and upcycling are some of the answers. Learn more about the work of the US Environmental Protection Agency, the Ocean Cleanup Array, the zero waste movement, and the many other government, business, research, and youth efforts working to solve our planet's garbage crisis.

Environmental Health in the 21st Century Richard V. Crume, 2018-02-08 This concisely written and easy to read resource provides information on emerging issues and valuable historical context that enables students to better understand a broad range of environmental health topics from pollution to infectious diseases, natural disasters, and waste management. As technology enables better insight into the world we live in, we are increasingly aware of environmental health concerns and risks from contaminated air and water to infectious diseases and light and noise pollution. Because the quality of our lives depends on the quality of our environment, everyone should be informed about issues in environmental health. *Environmental Health in the 21st Century: From Air Pollution to Zoonotic Diseases* presents hundreds of encyclopedic entries written by expert researchers and practitioners, a history of environmental health, and interviews with subject experts that broadly survey the field of environmental health. The set covers myriad subjects in environmental health, including all types of environmental pollution, the spread of communicable diseases, and other issues in the health sciences: waste management practices, the effects of climate change on human health, children's environmental health concerns, environmental health problems unique to the urban environment, and emerging threats such as the Zika virus and hospital-acquired infections. Readers will learn about steps they can take to reduce their environmental risk, understand the effects of key international treaties and conventions, and the contributions of key figures in environmental health, and also reflect on potential solutions for global challenges in environmental pollution, health sciences, energy, and climate, waste management, and the built environment. No other book on the market today addresses the environmental health field in such a comprehensive manner with the latest information provided by expert practitioners, all packed into two concise volumes.

Watershed Discipleship Ched Myers, 2016-10-21 This collection introduces and explores watershed discipleship as a critical contextual and constructive approach to ecological theology and practice, and features emerging voices from a generation that has grown up under the shadow of climate catastrophe. *Watershed Discipleship* is a triple entendre that recognizes we are in a watershed historical moment of crisis, focuses on our intrinsically bioregional locus as followers of Jesus, and urges us to become disciples of our watersheds. Bibliographic framing essays by Myers trace his journey into a bioregionalist Christian faith and practice and offer reflections on incarnational theology, hermeneutics, and ecclesiology. The essays feature more than a dozen activists, educators, and practitioners under the age of forty whose work and witness attest to a growing movement of resistance and reimagination.

across North America This anthology overviews the bioregional paradigm and its theological and political significance for local sustainability restorative justice and spiritual renewal Contributors reread both biblical texts and churchly practices such as mission baptism and liturgy through the lens of replacement Herein is a comprehensive and engaged call for a Transition church that can help turn our history around toward environmental resiliency and social justice by passionate advocates on the front lines of watershed discipleship CONTRIBUTORS Sasha Adkins Jay Beck Teyvyn East Erinn Fahey Katarina Friesen Matt Humphrey Vickie Machado Jonathan McRay Sarah Nolan Reyna Ortega Dave Pritchett Erynn Smith Sarah Thompson Lydia Wylie Kellermann

Waste Away Joshua Reno, 2016 Though we are the most wasteful people in the history of the world very few of us know what becomes of our waste In *Waste Away* Joshua O Reno reveals how North Americans have been shaped by their preferred means of disposal sanitary landfill Based on the author's fieldwork as a common laborer at a large transnational landfill on the outskirts of Detroit the book argues that waste management helps our possessions and dwellings to last by removing the transient materials they shed and sending them elsewhere Ethnography conducted with waste workers shows how they conceal and contain other people's wastes all while negotiating the filth of their occupation holding on to middle class aspirations and occasionally scavenging worthwhile stuff from the trash *Waste Away* also traces the circumstances that led one community to host two landfills and made Michigan a leading importer of foreign waste Focusing on local activists opposed to the transnational waste trade with Canada the book's ethnography analyzes their attempts to politicize the removal of waste out of sight that many take for granted Documenting these different ways of relating to the management of North American rubbish *Waste Away* demonstrates how the landfills we create remake us in turn often behind our backs and beneath our notice
