

# DATA-DRIVEN INSIGHTS: THE EFFECTS OF CLIMATE CHANGE ON GENDER AND DEVELOPMENT

*UN Women's Gender and Climate Data Works:  
Extracted Compilations*

## WOMEN'S EMPOWERMENT FOR INCLUSIVE CLIMATE ACTION

Climate change is intensifying the frequency and severity of hydrometeorological hazards. As temperatures change, rain patterns become erratic, and severe weather intensifies, livelihoods and ecosystem are increasingly affected. Immediate climate action is needed, and women and girls must be at the forefront of these efforts.

## IMPACT OF THE CLIMATE CRISIS ON PLANET AND PEOPLE

### FLOOD

The number of people exposed to flood-prone areas has risen by **almost a quarter** since 2000, including **extreme rainfall, rising sea levels and more intense hurricanes**. Several low-lying nations, such as Kiribati, Maldives, Marshall Islands and Tuvalu face existential threats due to sea-level rise and climate change. Floods are known to affect the availability of clean drinking water, thus worsening women's collection and treatment burdens.

### DROUGHTS

Today, 53 out of 191 countries and areas globally, home to **1.5 billion women and girls**, or **37.2 per cent** of the world's female population, face a high or very high exposure to droughts. Under a high-emissions scenario, projections suggest that exposure to this phenomenon could affect an additional **9 to 17 per cent** of the world's population by 2030, and **50 to 90 per cent** by 2080. Intensifying droughts and aridity correlate with worsening child marriage and adolescent birth rates in many countries.

## **Gendering Climate Change Geographical Insights:**

**Engendering Climate Change** Asha Hans, Nitya Rao, Anjal Prakash, Amrita Patel, 2021-03-02 This book focuses on the gendered experiences of environmental change across different geographies and social contexts in South Asia and on diverse strategies of adapting to climate variability. The book analyzes how changes in rainfall patterns, floods, droughts, heatwaves, and landslides affect those who are directly dependent on the agrarian economy. It examines the socio-economic pressures, including the increase in women's work burdens both in production and reproduction, on gender relations. It also examines coping mechanisms such as male migration and the formation of women's collectives which create space for agency and change in rigid social relations. The volume looks at perspectives from India, Pakistan, Bangladesh, and Nepal to present the nuances of gender relations across borders along with similarities and differences across geographical, socio-cultural, and policy contexts. This book will be of interest to researchers and students of sociology, development, gender economics, environmental studies, and South Asian studies. It will also be useful for policymakers, NGOs, and think tanks working in the areas of gender, climate change, and development. *Linking Gender to Climate Change Impacts in the Global South*

Shouraseni Sen Roy, 2018-04-18 This authored book assesses the spatial patterns of climate change and gender inequalities across the Global South and analyzes the disproportionate impacts that climate change processes have on women in these regions. Though many books attempt to incorporate gender issues into climate change, this book examines the issue as a whole by addressing the relationship between climate change and gender from a number of perspectives. The book incorporates case studies from various regions of the Global South, a designation broadly defined as the countries of Africa, Middle and South America, and most of Asia, including the Middle East. In the book's two main sections, readers will learn about how climate change affects access to regional opportunities and resources, the obstacles created by climate change that affect women more strongly than men, and how affected female populations adapt to changing conditions and protect their local livelihoods. Section one, covering chapters 1 and 2, addresses the spatial patterns of climate change and gender inequalities across the Global South by analyzing long-term trends from the latest reports of the Intergovernmental Panel on Climate Change (IPCC) and the World Economic Forum. Section two, covering chapters 3 through 7, discusses the critical issues related to climate change and gender inequality and presents literature reviews and case studies in the Global South. The different issues and perspectives discussed include health, water, and food security, education, conflicts, migration, participation in decision-making processes, and changing urban social landscapes. The concluding chapter discusses policy initiatives and makes recommendations to some of the gender mainstreaming through empowerment and participation. This interdisciplinary book will appeal to academics and policy makers beyond just the fields of environmental sciences and gender studies and may be adopted as a resource for graduate students and researchers. **Gendering Green**

**Criminology** Emma Milne, Pamela Davies, James Heydon, Kay Peggs, Tanya Wyatt, 2025-04-15 The first volume in green

criminology devoted to gender this book investigates gendered patterns to offending victimisation and environmental harms The collection advances debate on green crimes and climate change and will inspire students and researchers to foreground gender in reducing the challenges affecting our planet's future Climate Change and Gendered Livelihoods in Bangladesh Sajal Roy, 2021-11-07 Globally climate induced disasters have been impacting marginalised communities' lives livelihood and gendered relations This book explores the effects of Cyclone Aila as a result of climate change in 2009 on the rural livelihoods and gendered relations of two ethnically distinct forest communities Munda an indigenous group and Shora a Muslim group dwelling near the Sundarbans Forest in Bangladesh Examining the cyclone's medium to long term impacts on livelihoods and comparative aspects of gendered relations between these two contrasting communities this book addresses a gap in current critical development studies It adopts an ethnographic research design and analyses the alterations to livelihood activities and reconfiguration of gender relations within the Munda and Shora communities since 2009 The study primarily contends that post Aila livelihoods and gendered relations have been substantially transformed in both communities making the case that the improvement of local infrastructure as an important part of the geographical location has noticeably progressed the living conditions and livelihoods of some members of the Munda and Shora communities Connecting climate induced changes with the construction and alteration of gendered livelihood patterns the book will be of interest to a wide range of academics in the fields of Asian Studies Sociology of Environment Social Anthropology Human Geography Gender and Cultural Studies Human Geography Disaster Management and Forestry and Environmental Science *Human Rights Approaches to Climate Change* Sumudu Atapattu, 2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change its catastrophic impact on human beings was not really understood as a human rights issue until recently This book examines the link between climate change and human rights in a comprehensive manner It looks at human rights approaches to climate change including the jurisprudential bases for human rights and the environment the theoretical framework governing human rights and the environment and the different approaches to this including benchmarks In addition to a discussion of human rights implications of international environmental law principles in the climate change regime the book explores how the human rights framework can be used in relation to mitigation adaption and adjudication Other chapters examine how vulnerable groups women indigenous peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues Climate Change Adaptation Nalini Bikkina, Rama Mohana R. Turaga, 2024-06-20 This book discusses how climate change needs to be anchored in indigenous knowledge with reference to resource management infrastructure livelihoods and social institutions with a unique focus on risks and provenances of resilience available to the local

communities Beyond the scientific know how on climate change this volume highlights traditional wisdom which through its hands on learning plays a crucial role in amalgamation with cross scale understanding It documents the deliberations of a seminar that brought together traditional wisdom and cross scale understanding of academicians researchers practitioners and grassroots functionaries directly or indirectly working with communities in the area of climate change adaptation and thereby brings together adaptation and allied practices from across a spectrum of specialties and practitioner contexts It discusses several insights and novel practices and is purported to provide significant research and policy implications in the spirit of thinking globally but acting locally Routledge Handbook of Climate Justice Tahseen Jafry,2018-11-01 The term climate justice began to gain traction in the late 1990s following a wide range of activities by social and environmental justice movements that emerged in response to the operations of the fossil fuel industry and later to what their members saw as the failed global climate governance model that became so transparent at COP15 in Copenhagen The term continues to gain momentum in discussions around sustainable development climate change mitigation and adaptation and has been slowly making its way into the world of international and national policy However the connections between these remain unestablished Addressing the need for a comprehensive and integrated reference compendium The Routledge Handbook of Climate Justice provides students academics and professionals with a valuable insight into this fast growing field Drawing together a multidisciplinary range of authors from the Global North and South this Handbook addresses some of the most salient topics in current climate justice research including just transition urban climate justice and public engagement in addition to the field s more traditional focus on gender international governance and climate ethics With an emphasis on facilitating learning based on cutting edge specialised climate justice research and application each chapter draws from the most recent sources real world best practices and tutored reflections on the strategic dimensions of climate justice and its related disciplines The Routledge Handbook of Climate Justice will be essential reading for students and scholars as well as being a vital reference tool for those practically engaged in the field **Climate Justice in India** Prakash

Kashwan,2025-01-31 Academics activists and artists offer historically and socially grounded perspectives on climate justice in Indian society and politics The Routledge Handbook of Political Ecology Tom Perreault,Gavin Bridge,James McCarthy,2015-06-12 The Routledge Handbook of Political Ecology presents a comprehensive and authoritative examination of the rapidly growing field of political ecology Located at the intersection of geography anthropology sociology and environmental history political ecology is one of the most vibrant and conceptually diverse fields of inquiry into nature society relations within the social sciences The Handbook serves as an essential guide to this rapidly evolving intellectual landscape With contributions from over 50 leading authors the Handbook presents a systematic overview of political ecology s origins practices and core concerns and aims to advance both ongoing and emerging debates While there are numerous edited volumes textbooks and monographs under the heading political ecology these have tended to be relatively narrow in

scope either as collections of empirically based mostly case study research on a given theme or broad overviews of the field aimed at undergraduate audiences The Routledge Handbook of Political Ecology is the first systematic comprehensive overview of the field With authors from North and South America Europe Australia and elsewhere the Handbook of Political Ecology provides a state of the art examination of political ecology addresses ongoing and emerging debates in this rapidly evolving field and charts new agendas for research policy and activism The Routledge Handbook of Political Ecology introduces political ecology as an interdisciplinary academic field By presenting a state of the art examination of the field it will serve as an invaluable resource for students and scholars It not only critically reviews the key debates in the field but develops them The Handbook will serve as an excellent resource for graduate and advanced undergraduate teaching and is a key reference text for geographers anthropologists sociologists environmental historians and others working in and around political ecology *The Routledge Handbook of Environmental Justice* Ryan Holifield, Jayajit Chakraborty, Gordon

Walker, 2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists **African Handbook of Climate Change**

**Adaptation** Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a

major global challenge. However, some geographical regions are more severely affected than others. One of these regions is the African continent. Due to a combination of unfavourable socio-economic and meteorological conditions, African countries are particularly vulnerable to climate change and its impacts. The recently released IPCC special report 'Global Warming of 1.5°C' outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas. The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa. Also arid and semi-arid lands are likely to increase by up to 8% with severe ramifications for livelihoods, poverty eradication and meeting the SDGs. Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate. It is against this background that the African Handbook of Climate Change Adaptation is being published. It contains papers prepared by scholars, representatives from social movements, practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent. Encompassing over 100 contributions from across Africa, it is the most comprehensive publication on climate change adaptation in Africa ever produced.

**The Wiley Blackwell Companion to Political Geography** John A. Agnew, Virginie Mamadouh, Anna Secor, Joanne Sharp, 2017-07-24. The Wiley Blackwell Companion to Political Geography aims to account for the intellectual and worldly developments that have taken place in and around political geography in the last 10 years. Bringing together established names in the field as well as new scholars, it highlights provocative theoretical and conceptual debates on political geography from a range of global perspectives. Discusses the latest developments and places increased emphasis on modes of thinking, contested key concepts and on geopolitics, climate change and terrorism. Explores the influence of the practice-based methods in geography and concepts including postcolonialism, feminist geographies, the notion of the Anthropocene and new understandings of the role of non-human actors in networks of power. Offers an accessible introduction to political geography for those in allied fields including political science, international relations and sociology.

**Water Security Across the Gender Divide** Christiane Fröhlich, Giovanna Gioli, Roger Cremades, Henri Myrtilinen, 2017-10-05. This book examines water security as a prime example of how the economic, socio-cultural and political normative systems that regulate access to water reflect the evolving and gendered power relations between different societal groups. Access to water is characterized by inequalities; it depends not only on natural water availability but also on the respective socio-political context. It is regulated by gender-differentiated roles and responsibilities towards the resource which are strongly influenced by, among others, tradition, religion, customary law, geographical availability as well as the historical and socio-political context. While gender has been recognized as a key intervening variable in achieving equitable water access, most studies fail to acknowledge the deep interrelations between

social structures and patterns of water use Proof of these shortcomings is the enduring lack of data on water accessibility availability and utilization that sufficiently acknowledges the relational nature of gender and other categories of power and difference like class and socioeconomic status as well as their comprehensive analysis This book addresses this major research gap *Compassion in Disaster Management* Mark Crowther,2024-08-02 Should leadership minimise suffering This book argues yes offering leaders especially those in disaster management a way to improve their ability to lead serve and protect others during disasters and crises Drawing upon his own experiences as a disaster management specialist as well as high level interviews with disaster management leaders from the USA Australia and New Zealand Crowther bridges theory and practice to achieve three objectives Firstly to establish the political and socio cultural context in which disaster management leaders find themselves when seeking to protect citizens and minimise their suffering and vulnerability Secondly to provide an empirical account of how certain sociocultural influences affect their efficacy as leaders and that of their organisations when seeking to improve well being provide protection and reduce suffering and vulnerability Third to propose a relational leadership framework centred upon an ethic of compassion and supported by behaviours characteristics and practices that can guide leaders when addressing the causes of suffering and vulnerability across the entire disaster management cycle This framework progressively emerges as the reader navigates their way through each chapter An essential text for aspiring and experienced leaders especially those in the fields of Emergency Medical Services fire services law enforcement and emergency management It will also appeal to students and researchers in related disciplines **Doing Political Ecology** Gregory L. Simon,Kelly Kay,2024-10-02 Since its inception the field of political ecology has served as a critical hub for inclusive and transformative environmental inquiry *Doing Political Ecology* offers a distinctive entry point into this ever growing field and argues that our scholarly foundations today more than ever comprise a cross cutting latticework of research approaches and concepts This volume brings together 28 leading scholars from a range of backgrounds and geographies with contributions organized into 18 analytical lenses that highlight different approaches to critical environmental research and ways of seeing nature society interactions The book s contributors engage the breadth and depth of the field recognizing a variety of roots and genealogies and give ample voice to these rich and complementary lineages This inclusive presentation of the field allows diverse theoretical and empirical approaches to intermingle in novel ways Readers will emerge with a wide ranging understanding of political ecology and will attain a diverse toolkit for evaluating human environment interactions Each chapter astutely grounds key methodological theoretical topical and conceptual approaches that animate a range of influential cutting edge and complementary ways of doing political ecology Unveiling Pachacamac Giancarlo Marcone,2022-08-02 This volume synthesizes 25 years of new data and hypotheses on the sacred Andean site of Pachacamac a sanctuary that has an enduring presence in Peruvian history and plays a pivotal role in the formation of current views about religion and thought in the pre Hispanic period **The Palgrave Handbook of Social**

**Fieldwork** Nasir Uddin, Alak Paul, 2023-04-14 This handbook offers epistemologically and ontologically important personal accounts of academic and professional researchers having long term intensive comprehensive and ethnographic fieldwork in various social settings and versatile regional contexts across the globe The accounts are cross disciplinary including anthropology sociology geography political sciences gender studies forestry and environmental studies economics and international relations They are also trans regional covering the globe including South Asia Southeast Asia Africa Europe Latin America and North America The book offers a comprehensive portrait of multifaceted challenges that social researchers experience while doing fieldwork in various social settings The accounts provide both challenges of doing fieldwork in the 21st century and the ways how to address redress them in the field by complying with the codes of ethics and the politics of fieldwork Readers will benefit from the handbook by understanding methodological issues from both disciplinary relevance and regional specificity across time and spaces *Routledge Handbook of Feminist Peace Research*

Tarja Väyrynen, Swati Parashar, Élise Féron, Catia Cecilia Confortini, 2021-03-11 This handbook provides a comprehensive overview of feminist approaches to questions of violence justice and peace The volume argues that critical feminist thinking is necessary to analyse core peace and conflict issues and is fundamental to thinking about solutions to global problems and promoting peaceful conflict transformation Contributions to the volume consider questions at the intersection of feminism gender peace justice and violence through interdisciplinary perspectives The handbook engages with multiple feminisms diverse policy concerns and works with diverse theoretical and methodological contributions The volume covers the gendered nature of five major themes Methodologies and genealogies including theories concepts histories methodologies Politics power and violence including the ways in which violence is created maintained and reproduced and the gendered dynamics of its instantiations Institutional and societal interventions to promote peace including those by national regional and international organisations and civil society or informal groups bodies Bodies sexualities and health including sexual health biopolitics sexual orientation Global inequalities including climate change aid global political economy This handbook will be of great interest to students of peace and conflict studies security studies feminist studies gender studies international relations and politics Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
