Founding Fathers Of Sociology:

The Founding Fathers of Social Science Timothy Raison, 1969 **Feminist Sociology** Sara Delamont, 2003-04-21
Exploring the achievements of British feminist sociology in theory methods and empirical research Sara Delamont outlines the barriers to the development of feminism and explores contemporary challenges She provides an unrivalled guide to the origins of feminism in the discipline of sociology analyzes the uneasy relationships between feminists and the founding fathers and elucidates the opportunities and challenges presented by postmodernism **Founding Fathers of Sociology**

Sujit Kumar Choudhary, 2024-10 The book *Founding Fathers of Sociology* Comte Marx Spencer Durkheim and Weber is a significant collection of the works of Auguste Comte Herbert Spencer Karl Marx Emile Durkheim and Max Weber The book highlights the biographical sketch approaches perspectives theories and methodology of these said sociological thinkers

Sociology Anthony Giddens, Philip W. Sutton, 2010 Whilst particularly useful as a companion to the sixth edition of Giddens's *Sociology* the reader is designed for use independently or alongside other textbooks *New Directions in Social Theory* Kate Reed, 2006-06 Who makes up the canon of sociology and who doesn't Does sociology need a canon in the first place Offers an innovative and passionate contribution to debates on the history and development of sociology and the exclusion of theorists who are female black or both from the mainstream of social theorizing With compelling biographical sketches bringing the dynamics behind the canon to life Kate Reed focuses sharp analysis on the exclusion of theorists on race and gender from important debates on inequality

Key Ideas in Sociology Martin Slattery, 2003 Key Ideas in Sociology provides a tour d'horizon of the great sociological thinkers of the last two centuries their lives their main ideas and their influence on further thinking and practice in sociology Fifty key thinkers in sociology are represented both to give a sense of history to the development of the discipline and to exemplify the range of issues that have been covered Each essay concludes with an annotated Suggested Readings list and a General Bibliography is also provided *Handbook of Classical Sociological Theory* Seth Abrutyn, Omar Lizardo, 2021-11-01 This is the first handbook focussing on classical social theory It offers extensive discussions of debates arguments and discussions in classical theory and how they have informed contemporary sociological theory The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions This book presents new approaches to thinking about theory in relationship to sociological methods

Max Weber : critical assessments. 2,3 Peter Hamilton, 1998 *Handbook of Sociological Theory* Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete

head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory

Founders, Classics, Canons Peter Baehr, 2017-07-05 Founders classics and canons have been vitally important in helping to frame sociology's identity Within the academy today a number of positions feminist postmodernist postcolonial question the status of tradition In Founders Classics Canons Peter Baehr defends the continuing importance of sociology's classics and traditions in a university education Baehr offers arguments against interpreting defending and attacking sociology's great texts and authors in terms of founders and canons He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken Although he questions the uses to which the concepts of founder classic and canon have been put Baehr is not dismissive On

the contrary he seeks to understand the value and meaning these concepts have for the people who employ them in the cultural battle to affirm or attack the liberal university tradition Founders, Classics, Canons Peter R. Baehr, Three categories founders classics canons have been vitally important in helping to frame sociology's precarious identity defining the discipline's sense of its past and the implications for its current activity Today that identity is being challenged as never before Within the academy a number of positions feminist postmodernist poststructuralist postcolonial converge in questioning the status of the tradition These currents in turn reflect wider social questioning about the meaning and uses of knowledge in technologically advanced societies In Founders Classics Canons Peter Baehr scrutinizes the nature of this challenge He provides a model of the processes through which texts are elevated to classic status and defends the continuing importance of sociology's traditions for a university education in the social sciences The concept of classic is as Baehr notes a complex one Essentially it assumes a scale of judgment that deems certain texts as exemplary in eminence But what is the nature of this eminence Baehr analyzes various responses to this question Most notable are those that focus on the functions classics perform for the scholarly community that employs them the rhetorical force classics are said to possess and the processes of reception that result in classic status The concept of classic is often equated with two other notions founders and canon The former has a well established pedigree within the discipline but widespread usage of the latter in sociology is much more recent and polemical in tone Baehr offers arguments against these two ways of interpreting defending and attacking sociology's great texts and authors He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken While questioning the uses to which the concepts of founder classic and canon have been put Baehr's purpose is not dismissive On the contrary he seeks to understand the value and meaning they have for the people who employ them in the cultural battle to affirm or excoriate the liberal university tradition In examining the tactics of this battle this volume offers a model of how social theory can be critical rather than radical Peter Baehr teaches in the department of politics and sociology Lingnan University Hong Kong His previous book for Transaction Caesar and the Fading of the Roman World was designated an Outstanding Academic Book by Choice **Thomas Kuhn** Steve Fuller, 2000 This work discusses whether Kuhn's The Structure of Scientific Revolutions was revolutionary Steve Fuller argues that Kuhn held a profoundly conservative view of science and how one ought to study its history *Passionate Sociology* Ann Game, Andrew W. Metcalfe, 1996-08-22 Offering a major challenge to established textbooks and pointing to inspiring new ways of approaching sociology this book presents a notable shift in introductory sociology Too often the subject is taught as a dry and detached system of thought and practice Passion is regarded as something to avoid or to treat with inherent suspicion By asking questions about sociology and its relation to passion the authors seek to revitalize the subject The book introduces and develops a number of themes such as

identity knowledge magic desire power and everyday life It argues that students should analyze these themes through practices including reading writing speaking storytelling and organizing The authors aim to intr **21st Century Sociology: A Reference Handbook** Clifton D. Bryant,Dennis L. Peck,2007 Publisher Description *Sociology and the World's Religions* M. Hamilton,1998-08-09 Sociological and related studies of systems of religion tend to be fragmented This book brings together and assesses a diverse range of substantive sociological anthropological and social psychological scholarship dealing with the broad spectrum of religious belief experience and behaviour from the work of anthropologists on the religions of tribal and pre industrial peoples to explorations of the origins development and impact of the great world religions The book will have particular appeal not only in the fields of sociology social anthropology but also religious studies

The Founding Fathers of Social Science: a Series from New Society Timothy Raison,1969 **The Sociological Domain** Philippe Besnard,1983-03-31 Emile Durkheim one of the founding fathers of sociology has been the subject of many studies But this book is the first to introduce the individual and collective work of his colleagues and disciples who formed with him the French school of sociology Such an association of talented scholars was a unique event in the history of sociology and a decisive landmark in the development of the discipline In this book examination of the texts of the Durkheimians is combined with analysis of the social and intellectual group attempted to create a new social science In this respect the present book is also instructive about the birth and institutionalisation of academic disciplines in general But studying the work of the Durkheimians goes beyond historical research the Durkheimians can still offer lessons in the exploration of the territory of sociology an area in which so much virgin land remains unmapped **Reader's Guide to the Social Sciences** Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense
