International Business in Canada Alan M. Rugman, 1989 Perspectives on the New Economics and Regulation of Telecommunications Institute for Research on Public Policy, 1996 This volume is a compilation of papers reflecting many of the issues related to telecommunications that are being debated today and are likely to continue to be addressed in the next few years The papers examine the ways in which economic and technological forces are changing the regulation of telecommunications and the characteristics of the industry itself After an introduction on issues such as the information highway industry consolidation market integration and constraints on new policies the papers cover such topics as the changes in Canadian telecommunications and their economics the role of telecommunications in productivity and competition the business network concept as an alternative governance structure competition policy convergence of technologies separation of infrastructure from services European telecommunications policy and the historical context in which Canada has handled earlier transformations of a technological nature Global Perspectives on E-Commerce Taxation Law Dr Subhajit Basu, 2013-01-28 In its most advanced form e commerce allows unidentified purchasers to pay obscure vendors in electronic cash for products that are often goods services and licenses all rolled into one This book considers the implications for the domestic and international tax systems of the growth of e commerce It covers a wide variety of activities from discussion of the principles governing direct and indirect taxation to explanation of the implementation and use of e commerce on the part of businesses as well as the application of existing tax principles in this field With its focus on the broader issues surrounding the expansion of e commerce and its attention to the problems arising internationally in this field Global Perspectives in E Commerce Taxation Law will appeal to scholars worldwide **International Business Strategy**

S. Raghunath, Elizabeth L. Rose, 2016-12-10 This volume fills a gap in the international business literature offering the perspectives of researchers who are deeply embedded in one key emerging market India With the global economy changing dramatically firms from emerging markets are playing increasingly important roles in both outward and inward internationalisation *International Business Strategy* offers profound insights into international business activities in this rapidly evolving environment in which multinational corporations from emerging markets are now influential players Reflecting the complex nature of India itself the chapters employ a variety of theoretical lenses to shed light on a wide range of issues encountered by Indian businesses from some of the world s largest corporations to small entrepreneurial firms

Transfer Pricing in a Post-BEPS World Michael Lang, Alfred Storck, 2016-04-20 The OECD's Base Erosion and Profit Shifting BEPS project promises to make effective inroads into the much criticized corporate tax strategy known as aggressive transfer pricing whereby the profitability of subsidiaries in different jurisdictions is managed via mispricing with the intent of minimizing the corporation's overall tax burden. Although the OECD BEPS project is an ongoing endeavor, its accomplishments to date and developing trends are discernible. This book, including contributions by outstanding and renowned transfer pricing experts both from practice and academia, analyses these trends and proposes reforms which would ensure that transfer pricing outcomes are better aligned with economic activities and value creation, which achieves a more equitable distribution of profits among different countries. Each chapter is dedicated to specific sections of the OECD's BEPS Action Plan. Among the topics and issues covered are the following: arm's length principle and its ongoing development; allocation of risk and recharacterization of intangibles; both license model and cost contribution arrangements; interest deductions and intra-group financing; low value adding services; commissionaire arrangements and low risk distributors; attribution of profits to permanent establishments; documentation requirements including Country by Country Reporting. Within these topics, measures to identify the commercial and financial relationships inside multinational enterprises to accurately delineate actual transactions as well as guidance on defining risk and its allocation among entities of a multinational enterprise are discussed. The book is based on papers presented and discussed at the first Global Transfer Pricing Conference hosted in February 2016 by the WU Transfer Pricing Center at the Institute for Austrian and International Tax Law at WU Vienna University of Economics and Business. The most up to date and thorough consideration of transfer pricing yet published, this book will prove invaluable for all parties currently facing questions related to transfer pricing in a post BEPS world, especially those in charge of finding an ideal answer to them: academics, practitioners including in-house and advisory counsel, international organizations, CEOs and CFOs of multinational enterprises and government officials who are tax and transfer pricing experts.

Networks and Location A. Goerzen, 2005-08-02 Based on data from Japan, the book examines the combined effect of product, geographic and network diversity on multinational enterprise performance. A new measure for geographic scope is developed, one that considers the related elements of international asset dispersion and country environment diversity. The book also introduces a new concept of network diversity and examines how it is strategically linked to performance. Perhaps most importantly, the book is able to empirically and theoretically demonstrate that a larger, more diverse network of alliances is not necessarily a good idea. These are important findings with far-reaching implications for practice and theory.
