1. Reproduced below is the telephone game from Section 4.2. Find all Nash equilibria in mixed strategies.

The Telephone Game

		Winnie	
		Call	Wait
Colleen	Call	0,0	2,3
	Wait	3,2	1,1

ANSWER: Let p denote the probability that Colleen chooses call and q the probability that Winnie chooses call. For Colleen to be indifferent, Winnie must randomize in such a way that Colleen's expected payoff from call is the same as her expected payoff from wait:

$$q \cdot 0 + (1 - q) \cdot 2 = q \cdot 3 + (1 - q) \cdot 1 \implies q = \frac{1}{4}.$$

Thus, if Winnie calls with probability $\frac{1}{4}$, then Colleen is indifferent between calling and waiting. Of course, for Winnie to find it optimal to randomize, she must receive the same expected payoff from her two pure strategies, which requires that Colleen choose p , so that

$$p \cdot 0 + (1 - p) \cdot 2 = p \cdot 3 + (1 - p) \cdot 1 \implies p = \frac{1}{4}.$$

Since this is a symmetric game, it is not surprising that the equilibrium is symmetric. The telephone game then has three Nash equilibria: (1) Colleen chooses call and Winnie chooses wait; (2) Colleen chooses wait and Winnie chooses call; and (3) both Colleen and Winnie choose call with probability $\frac{1}{4}$ and wait with probability $\frac{3}{4}$.

2. The count is three balls and two strikes, and the bases are empty. The batter wants to maximize the probability of getting a hit or a walk, while the pitcher wants to minimize this probability. The pitcher has to decide whether to throw a fast ball or a curve ball,

IAAC Bits 10 - Learning Cities Areti Markopoulou,2023-06-20 The digital intelligence that is inevitably starting to penetrate every aspect of our previously analogue systems of living working or social interacting calls for new models of designing our city and opens new territories of experimentation in the processes related to urban design While the idea of intelligent machines that simulate cognitive functions such as learning or problem solving is not new its extensive use in recent years in the urban design discipline opens up a series of new possibilities as well as plenty of cultural ethical or even aesthetic hesitations and risks How do our cities
