Whitaker's Books in Print ,1998 Enhancing Academic Motivation Norman Brier,2006 This approach is designed for working with students in grades 6 8 It is based on research that focuses on the relationship between school failure and the lack of academic motivation The program employs a structured intervention format divided into 16 sessions Although designed for classroom use the sessions can easily be adapted for small groups or individuals Storytelling role playing and homework assignments are key elements of the program Students become more willing to approach learning tasks and to display a higher level of engagement effort and persistence even when experiencing frustration or anxiety The manual includes reproducible worksheets program forms and a parent component BOOK JACKET **Academic Motivation of Adolescents** Tim Urdan, Frank Pajares,2002-09-01 Few academic issues are of greater concern to teachers parents and school administrators than the academic motivation of the adolescents in their care There are good reasons for this concern Students who are academically motivated perform better in school value their schooling are future oriented in their academic pursuits and possess the academic confidence and positive feelings of self worth so necessary to increasing academic achievement Because academically motivated students engage their schoolwork with confidence and interest they are less likely to drop out of school suffer fewer disciplinary problems and prove resilient in the face of setbacks and obstacles It is precisely because academic motivation is so essential to academic achievement that motivation has taken a place along with cognition as one of the most followed lines of inquiry in educational psychology In this volume we are fortunate to gather together some of the most eminent scholars who have written extensively about the academic motivation of adolescents We are fortunate also in that they represent the varied theories and lines of inquiry that currently dominate research in this area In all we believe that in the dozen chapters that comprise this volume the authors provide elegant insights regarding the

academic and social motivation of adolescents that will prove of interest to researchers students teachers school administrators parents policymakers and all others who play a pivotal role or are otherwise invested in the lives of adolescents in today s society It is our hope that these insights will not only further the conversation on adolescence and education but will serve as the impetus for further research capable of generating the creative ideas programs and structures so necessary to better the lives of the young people in our care
