*Marketing for Entrepreneurs* Frederick G. Crane, 2009-09-16 One of the primary reasons most often cited for the failure of a new venture is the entrepreneur's inability to identify and exploit the right idea This is directly connected to the concepts and principles of marketing specifically knowing what to produce and knowing what not to produce Additionally even if the entrepreneur has the right idea many experts cite weak marketing efforts marketing execution as another reason for venture failure *Marketing for Entrepreneurs* moves beyond the classic 4Ps and demonstrates the application of marketing in an entrepreneurial context Traditional marketing texts are incapable of addressing marketing concepts directly applicable to the entrepreneur's unique situation Furthermore general entrepreneurship books are also not applicable because they tend to focus on management teams or the development of business plans while failing to address critical marketing dimensions

**Social Entrepreneurship** Constant Beugré, 2016-11-03 Social entrepreneurship differs from traditional forms of entrepreneurship in that the primary goal of the social venture is to address social problems and needs that are as yet unmet The driving force of such ventures is social value creation This new textbook aims to provide a comprehensive cutting edge resource for students introducing them to the unique concerns and challenges that face social ventures through a comparison with the principles of traditional entrepreneurship The book consists of fourteen chapters covering all aspects of venture creation and management from writing a business plan to financing people management marketing and social impact measurement Social Entrepreneurship uses real life examples and sources to expose students to contemporary

developments in the field encouraging them to think critically about the issues faced by social ventures across the globe and experiential exercises and assignments are included to provide students with hands on experience in creating and managing their own social ventures Also containing review and application questions illustrative cases definitions of key terms and a comprehensive companion website Social Entrepreneurship is the essential guide to this rapidly emerging field Visit the companion website at [www.routledge.com/cw/beugre](http://www.routledge.com/cw/beugre) to find For Instructors PowerPoint slides Multiple choice questions For Students Extra illustrative cases Web links Links to video

**Analysis of the German EXIST-II-Program and Its Transferability to Mexico** Claudia Erika Gutiérrez Díaz, 2013 The promotion of entrepreneurship in higher education appears in the political spectrum as a new economic policy arena In this field policy blanks and new kinds of problems need to be addressed Scholars agree that many of the current structures and models in higher education do not fit the necessary requirements for the development of entrepreneurship training New perspectives in this field can be gained through an analysis of the feasibility of a policy transfer of the German EXIST II Program to Mexico This program was developed to address the entrepreneurial potential within higher educational institutions through the coordination of entrepreneurial efforts carried out by regional national and supranational actors An empirical analysis of the objectives regulations actors and governance personnel staff financial resources beneficiaries and output of the program as well as a comparative study of Germany versus Mexico in this book demonstrates under what conditions the transfer of know how from Germany specifically from the EXIST II Program to universities in Mexico could be implemented The research offers alternatives to improve the current ongoing initiatives in Mexico

Nurturing Science-based Ventures Ralf W. Seifert, Benoît F. Leleux, Christopher L. Tucci, 2008-01-25 Few would deny that small entrepreneurial firms play an important economic and social role Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product GNP Not all small firms qualify as entrepreneurial entities however While small refers mostly to size entrepreneurial refers to growth and a value creation orientation The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow As such they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures This book clearly addresses those entrepreneurs who are interested in leading hi growth potential companies

Table 1	Table 1	Growth Typology of Small Firms	1	Type of venture	Desired sales range	Future employees	Lifestyle
0 to 1 million	0 to 4	Smaller	high potential	1 million to 20 million	5 to 50	High potential	over 20 million
Over 50	High	innovation	technology based	startups	assume a very special role in hi growth entrepreneurship	Although these startups constitute a comparatively low number of small businesses they produce proportionately far more jobs than their low and medium innovation counterparts	The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship

An area of major concern to us is a fact revealed in the latest GEM report The rate of European hi expectation entrepreneurial activity is among the lowest in the world

Public Value Adam Lindgreen, Nicole

Koenig-Lewis, Martin Kitchener, John Brewer, Mark Moore, Timo Meynhardt, 2019-05-08 Over the last 10 years the concept of value has emerged in both business and public life as part of an important process of measuring benchmarking and assuring the resources we invest and the outcomes we generate from our activities In the context of public life value is an important measure on the contribution to business and social good of activities for which strict financial measures are either inappropriate or fundamentally unsound A systematic interdisciplinary examination of public value is necessary to establish an essential definition and up to date picture of the field In reflecting on the public value project this book points to how the field has broadened well beyond its original focus on public sector management has deepened in terms of the development of the analytical concepts and frameworks that linked the concepts together and has been applied increasingly in concrete circumstances by academics consultants and practitioners This book covers three main topics deepening and enriching the theory of creating public value broadening the theory and practice of creating public value to voluntary and commercial organisations and collaborative networks and the challenge and opportunity that the concept of public value poses to social science and universities Collectively it offers new ways of looking at public and social assets against a backdrop of increasing financial pressure new insights into changing social attitudes and perceptions of value and new models for increasingly complicated collaborative forms of service delivery involving public private and not for profit players
