**Entrepreneurship and Enterprise Development in Africa** Daniel Agyapong, Rosemond Boohene, 2024-03-14

Entrepreneurship and Enterprise Development in Africa presents a timely and compelling account of African entrepreneurship shedding light on the critical part it plays in the continent's economic growth and development. It explores the various challenges, opportunities, and success stories that define the African entrepreneurial landscape and highlights the ingenuity and determination of the continent's entrepreneurial minds. Transformational Entrepreneurship Practices Gideon Maas, Paul Jones, 2019-03-29 Presenting an updated overview of transformational entrepreneurship, this book explores how critical concepts can be contextualised for different regions and countries, underlining the fact that no one system fits all. In order for entrepreneurship to play a role in socio-economic development, a balance needs to be struck between focusing on individual entrepreneurial activities and regions and society-wide changes. Building on the Editors' previous books, *Systemic Entrepreneurship* and *Entrepreneurship Centres*, this volume delves deeper into the importance of innovative eco-systems, providing examples of how transformational entrepreneurship can be implemented in different geographical locations. An invaluable read for policy makers as well as scholars, the authors provide a series of detailed case studies from regions including the UK, Malaysia, and Africa.

## **Sustainable Education and Development—Clean Energy** Clinton

Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel

Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference. This volume concentrates on papers in the area of clean energy. Despite considerable progress, more than 700 million people worldwide still lack access to electricity, and around 2.4 billion people continue to use harmful and polluting fuels for cooking. While efforts have been made to promote renewable energy and energy efficiency, they have not been fast enough to achieve Sustainable Development Goal 7. Adding to the challenge, the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe. In response to the energy crisis, some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency. However, others are considering a resurgence of coal, which poses a risk to the overall green transition. Between 2010 and 2020, the percentage of the global population with access to electricity increased from 83% to 91%, with 1.3 billion people gaining access. Nevertheless, this leaves approximately 733 million people still without electricity, and most of them reside in sub-Saharan Africa. Achieving universal access by 2030, the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points, necessitating significant efforts in low-income, fragile, and conflict-affected countries. In 2020, 69% of the global population had access to clean cooking fuels and technologies. While more than half of those without access to clean cooking fuels live in Asia, the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa. The share of renewable sources in total final energy

consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015. The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress. Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019. However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3. International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018. This decline occurred even before the onset of the COVID-19 pandemic. Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019. Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind. It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020. The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research discussions and its dissemination. Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings. Annual Report United States. Economic Development Administration, 1975. *Farewell to Farms* Deborah Fahy Bryceson, Vali Jamal, 2019-05-23. First published in 1997 this volume asks whether Africa's future is necessarily rooted in peasant agriculture. The title of this book *Farewell to Farms* is deliberately intended to challenge the widely held view that Africa is the world's reserve for peasant farming. African rural populations are themselves moving away from a reliance on agriculture. Deagrarianisation takes the form of urban migration as well as the expansion of non agricultural activities in rural areas providing new income sources occupations and social identities for rural dwellers. Using recent continent wide case study evidence the authors assess the impact of deagrarianisation on household welfare business performance and national development. Their findings which reveal new economic trajectories and social patterns emerging from a period of accelerated change call into question assumptions about Africa's future place in the world division of labour. *EDA Directory of Approved Projects* United States. Economic Development Administration, Responsibility Beyond Growth Stevienna de Saille, Fabien Medvecky, Michiel van Oudheusden, Kevin Albertson, Effie Amanatidou, Timothy Birabi, Mario Pansera, 2020-07-15. Critically assessing growth based models of innovation policy this enlightening study sparks new debate on the role and nature of responsible innovation. Drawing on insights from economics politics and science and technology studies it proposes the concept of responsible stagnation as an expansion of present discussions about growth degrowth.

responsibility and innovation within planetary limitations This important intervention explores real world relationships between the political economy innovation policy and concepts of responsibility and will be an invaluable resource for individuals and civil society organizations who seek to promote responsible innovation      **Enterprise Clusters and Networks in Developing Countries** Meine Pieter van Dijk, 2005-07-05 Enterprise Clusters and Networks in Developing Countries analyses the functions and advantages of clusters and networks for small enterprises in developing countries In the opening chapter the editors describe different types of clusters and networks and compare the diverse forms of external economies and co operation effects derived from them Taking a multidisciplinary approach they point out it is trust that is the social basis for positive effects of clustering and networking which are often sources of co operation and technology diffusion for small enterprises in developing countries      **Report** United States.
