**Understanding Ethics** Torbjørn Taennsjo, 2013-05-31 Torbjørn Taennsjo presents 7 radically different moral theories utilitarianism egoism deontological ethics the ethics of rights virtue ethics feminist ethics environmental or ecological ethics each of which attempts to provide the ultimate answer

**Philosophy as Practice in the Ecological Emergency** Lucy Weir, 2023-03-30 This book argues that philosophy is as practical as plumbing and what we need right now is what philosophers can offer as philosophers to help us all our species and beyond through this ecological emergency this climate change this anthropocene This book is about the meaning and purpose of philosophy as a way of a practice of responding to the ecological emergency which includes climate change biodiversity loss pollution habitat destruction and all the associated impacts that fragment and threaten to create collapse among the systems that created and sustain us There are the related economic and social impacts the fragmentation of communities and political ideologies through attitude polarisation and the increasing threats to systems by those who seek to promote further exploitation at the

expense of attempts to regain some system of cooperation and an attitude of compassion which is at the heart of our survival strategies as a species Philosophy has always sought to address questions related both to our place in the universe and to how to live given our understanding of our place Those of us committed to a philosophical life have used a range of metaphors and narratives to enlighten and to exhort to action those who would seek to understand what to do how and why Philosophy has played a key role in helping us as a species to respond to the ecological emergency What then is the practice of philosophy given that we re in an ecological emergency This question is the thread and it forms the framework for the dialogue that runs through the book

**Green Public Ethics** Jan Olsson,2024-10-21 This book argues that ethical reasoning should be adopted into policy processes in order to improve environmental regulations It considers how public administrators and civil servants play key roles in policy making and implementation and demonstrates how the inclusion of green public ethics at every stage of the policy process could drastically enhance sustainable development initiatives Filling an important void in the literature on policymaking and environmental ethics the book draws from empirical case studies to demonstrate how green ethical reasoning can be utilised by practitioners and stakeholders in democratic governments It will appeal to all those interested in public policy public administration philosophy and environmental studies

*Animal Property Rights* John Hadley,2015-08-14 *Animal Property Rights* A Theory of Habitat Rights for Wild Animals represents the first attempt to extend liberal property rights theory across the species barrier to animals It broadens the traditional focus of animal rights beyond basic rights to life and bodily integrity to rights to the natural areas in which animal reside John Hadley argues that both proponents of animal rights and environmentalists ought to support animal property rights because protecting habitat promotes ecological values and helps to ensure animals live free from human interference Hadley s focus is pragmatist he locates animal property rights within the institution of property as it exists today in liberal democracies He argues that attempts to justify animal property rights on labor and first occupancy grounds will likely fail instead he grounds animal property rights upon the importance of habitat for the satisfaction of animals basic needs The potential of animal property rights as a way of reinvigorating existing public policy responses to the problem of biodiversity loss due to habitat destruction is thoroughly explored Using the concept of guardianship for cognitively impaired human beings Hadley translates habitat rights as a right to negotiate human guardians ought to be allowed to negotiate on behalf of wild animals with human landholders whose development activities put animals at risk In addition to a theory of animal property rights *Animal Property Rights* affords a critique of Donaldson and Kymlicka s wild animal sovereignty theory a defence of indirect approaches to animal rights an extensive discussion of euthanasia as a therapeutic hunting tool and the first discussion of Locke s theory of original acquisition in animal rights literature

**Love is Green: Compassion as responsibility in the ecological emergency** Lucy Weir,2020-01-31 This book links three themes non dualistic agency the good of systems and compassionate attunement and relates them to the ecological emergency The author begins by examining how we currently

understand our ability to choose what we do our agency and conclude that this is dualistic we think of an action to do and then we physically act Yet an understanding that we are enmeshed in context means our capacity to act freely dissolves in the mesh We evolved capacities for consciousness and awareness capacities that allow us to realise that we are here now but that do not inevitably imply choice Our capacity for realisation gives us the ability to elicit an emotional response When we understand our enmeshment we can attune to a deep compassion for ourselves and indeed for all systems unfolding through time Compassionate attunement allows a different set of options for action to become available to us This then shifts how we respond to ourselves our human relationships and to the ecological emergency we are currently embroiled in This work is inspired by the great Kamakura Zen Master Eihei D gen The book s contribution is to extend and link the notion of practice realisation with the literature on evolutionary biology and entropy maximisation which allows us to speak of the good of systems Systems unfold as good for us when biodiversity maximisation occurs By considering the ecological emergency in light of compassionate attunement we open ourselves to a new array of possibilities for action Some of these the author outlines in the conclusion relating them to existing literature on compassionate achievement and compassionate communication to show how our this practice shifts our relationship to ourselves to one another and to the ecological emergency thus changing the course of human history

#### **ECOLOGY, COMMUNICATION AND ENVIRONMENT**

Jay Prakash Tiwari,2021-11-25 ECOLOGY COMMUNICATION AND ENVIRONMENT Perspectives of the Vedic Philosophy This book attempts to relate the environmental problems with patterns of our communication with nature It is a comparative study of the Judaeo Christian and Vedic worldviews and their articulations in the human communication with nonhuman world The author explores the Vedic cosmology metaphysics concepts of Rta dharma and yajna and extracts and systematizes them into the pattern of human communication with the nonhuman world with reference to the environmental ethics So far as I know this is a unique work in the area of Vedic environmental philosophy I hope the book will provide some valuable insights and it will inspire further studies in the area of Vedic environmental philosophy

#### **Environmental Philosophy**

Simon P. James,2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we

humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues

**The US and the World We Inhabit** Anastasia Cardone, Paola Loreto, Adele Tiengo, 2019-11-29 Environmental and global outlooks are currently at the center of the most lively and urgent international scholarship This volume serves to overcome the self referentiality of American studies by intersecting the study of American literature and history with the questions and concerns raised by these perspectives It reconceptualizes the mutual and shifting positions of center s and margin s and subject s and object s in terms of relation and an inclusive structure of relations based on an ecological ethics The contributions here explore many methodological hypotheses ranging from Christa Greve Vollp s work on eco cosmopolitanism to Peter Bardaglio s report on US climate activism as well as the ecocritical and ecofeminist viewpoints of Scott Slovic and Greta Gaard respectively In addition to contributing to academic discourse the essays written by both young and established international scholars and coherently arranged into four thematic sections explore topics that are of interest to the broader public The issues discussed here include identity and new forms of belonging migration and the environment ecolanguage ecopoetry and ecopoetics translation and multilingualism animal studies environmental activism shifting geographies and ecofeminism

The 'Ecosystem Approach' in International Environmental Law Vito De Lucia, 2019-03-28 The ecosystem approach broadly understood as a legal and governance strategy for integrated environmental and biodiversity management has been adopted within a wide variety of international environmental legal regimes and provides a narrative a policy approach and in some cases legally binding obligations for States to implement what has been called a new paradigm of environmental management In this last respect the ecosystem approach is also often considered to offer an opportunity to move beyond the outdated anthropocentric framework underpinning much of international environmental law thus helping re think law in the Anthropocene Against this background this book addresses the question of whether the ecosystem approach represents a paradigm shift in international environmental law and governance or whether it is in conceptual and operative continuity with legal modernity This central question is explored through a combined genealogical and biopolitical framework which reveals how the ecosystem approach is the result of multiple contingencies and contestations and of the interplay of divergent and sometimes irreconcilable ideological projects The ecosystem approach this book shows does not have a

univocal identity and must be understood as both signalling the potential for a decisive shift in the philosophical orientation of law and the operationalisation of a biopolitical framework of control that is in continuity with and even intensifies the eco destructive tendencies of legal modernity It is however in revealing this disjunction that the book opens up the possibility of moving beyond the already tired assessment of environmental law through the binary of anthropocentrism and ecocentrism

**Novel Ecosystems** Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystem services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today's rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at [www.wiley.com/go/hobbs\\_ecosystems](http://www.wiley.com/go/hobbs_ecosystems)

**Paul Ricoeur and Environmental Philosophy** David Utsler, 2024-08-19 Paul Ricoeur and Environmental Philosophy expands the scope of Ricoeur's philosophy especially his hermeneutics to issues of environmental philosophy and our contemporary environmental crisis David Utsler argues that although Ricoeur himself was not an environmental philosopher his work provides frameworks to reconsider our way of being in the world as it pertains to our relationship with the environment The unprecedented environmental crisis can be thought of as the result of interpretations bad ones and the crisis we now face requires the task of new and creative interpretation This book discusses the ways in which Ricoeur's hermeneutics has the potential to restructure the discourse and dialogue surrounding environmental issues and to creatively mediate the many conflicting interpretations that call for resolution Utsler does not claim this text to be a comprehensive application of Ricoeur's work to environmental philosophy as he believes there is still a great deal more of Ricoeur's philosophy from which to draw to enrich the growing field of environmental hermeneutics

**Renaturierung von Ökosystemen im Spannungsfeld von Mensch und Umwelt** Stefan Zerbe, 2019-07-26 In diesem disziplin bergreifenden Fachbuch welches die Brücke zwischen den Natur

und Sozialwissenschaften schließt werden sowohl die wissenschaftlichen Grundlagen der Renaturierungskologie wie auch praktische Aspekte der Ökosystemrenaturierung umfassend dargestellt. Hierbei werden die Vielfalt der Landnutzungstypen mit einem Schwerpunkt auf Mitteleuropa herausgestellt und Fallbeispiele von praktischen Renaturierungsprojekten präsentiert. Das Fachbuch bietet sowohl für Studierende die sich mit der Umwelt beschäftigen als auch für Wissenschaftler wie auch für Praktiker einen profunden und aktuellen aber auch kritischen Überblick über den Stand des Wissens. Dieses Buch erschließt das breite Spektrum degradierter Ökosysteme der mitteleuropäischen Natur und Kulturlandschaften. In weiteren Kapiteln wird auf marine Ökosysteme und deren Renaturierung sowie auf Entwicklungspotenziale aber auch Grenzen der Renaturierung detaillierter eingegangen. Die ökologischen Grundlagen werden durch eine interdisziplinäre Perspektive unter Berücksichtigung der Umweltethik, Soziologie, Anthropologie und Ökonomie erweitert. Das Fachbuch bietet neben einer aktuellen Übersicht über die verschiedenen Bereiche und Tätigkeitsfelder der Renaturierungskologie und Ökosystemrenaturierung eine wertvolle Grundlage für Studium, Wissenschaft und Praxis. Die Studierenden erhalten zudem eine Hilfestellung zur Literatursuche und kritischen Faktenanalyse und die Dozenten zu Lehrformen und interdisziplinären Diskussionsansätzen der Renaturierungskologie.

*OCR Religious Ethics for AS and A2* Jill Oliphant, 2014-06-27 Structured directly around the specification of the OCR, this is the definitive textbook for students of Advanced Subsidiary or Advanced Level courses. The updated third edition covers all the necessary topics for Religious Ethics in an enjoyable student friendly fashion. Each chapter includes a list of key issues, OCR specification checklist, explanations of key terminology, overviews of key scholars and theories, self-test, review questions, exam practice questions. To maximise students' chances of success, the book contains a section dedicated to answering examination questions. It comes complete with diagrams and tables, lively illustrations, a comprehensive glossary and full bibliography. Additional resources are available via the companion website.

*Environmental Ethics and Behavioural Change* Benjamin Franks, Stuart Hanscomb, Sean Johnston, 2017-12-14 Environmental Ethics and Behavioural Change takes a practical approach to environmental ethics with a focus on its transformative potential for students, professionals, policy makers, activists and concerned citizens. Proposed solutions to issues such as climate change, resource depletion and accelerating extinctions have included technological fixes, national and international regulation and social marketing. This volume examines the ethical features of a range of communication strategies and technological, political and economic methods for promoting ecologically responsible practice in the face of these crises. The central concern of the book is environmental behaviour change: inspiring, informing and catalysing reflective change in the reader and in their ability to influence others. By making clear the forms of environmental ethics that exist and what each implies in terms of individual and social change, the reader will be better able to formulate, commit to, articulate and promote a coherent position on how to understand and engage with environmental issues. This is an essential companion to environmental ethics and philosophy courses as well as a great resource for professionals interested in practical approaches to environmental ethics. It is also

excellent supplementary reading for environmental studies environmental politics and sustainable consumption courses
