Class Warfare Lois Weis, Kristin Cipollone, Heather

Jenkins, 2014-04-02 Stories abound about the lengths to which middle and upper middle class parents will go to ensure a spot for their child at a prestigious university From the Suzuki method to calculus based physics from AP tests all the way back to early learning Kumon courses students are increasingly pushed to excel with that Harvard or Yale acceptance letter held tantalizingly in front of them And nowhere is this drive more apparent than in our elite secondary schools In Class Warfare

Lois Weis Kristin Cipollone and Heather Jenkins go inside the ivy yearning halls of three such schools to offer a day to day week by week look at this remarkable drive toward college admissions and one of its most salient purposes to determine class Drawing on deep and sustained contact with students parents teachers and administrators at three iconic secondary schools in the United States the authors unveil a formidable process of class positioning at the heart of the college admissions process They detail the ways students and parents exploit every opportunity and employ every bit of cultural social and economic capital they can in order to gain admission into a Most Competitive or Highly Competitive Plus university Moreover they show how admissions into these schools with their attendant rankings are used to lock in or improve class standing for the next generation It s a story of class warfare within a given class the substrata of which whether economically racially or socially determined are fiercely negotiated through the college admissions process In a historic moment marked by deep economic uncertainty anxieties over socioeconomic standing are at their highest Class as this book shows must be won and the collateral damage of this aggressive pursuit may just be education itself flattened into a mere victory banner

Knowledge Matters Diana Rhoten, Craig Calhoun, 2011-02-21 Higher education can be a vital public good providing opportunities for students informed citizens for democracy and knowledge to improve the human condition Yet public investment in universities is widely being cut often because public purposes are neglected while private benefits dominate In this collection international scholars confront the realities of higher education and the future of its public and private agenda Their perspectives illuminate the trajectory of education in the twenty first century and the continuing importance of the university s public mission Reporting from Asia Africa Europe Latin America and North America these scholars look at the different ways universities struggle to serve public and private agendas Contributors examine the implications of changes in funding sources as well as amounts different administrative and policy decisions and the significance of various approaches to assessment and evaluation They ask whether wider student access has in fact resulted in social mobility whether more scientific research can be treated as an open access resource how changes in academic publishing change access to knowledge and whether universities get full value from research sold to private corporations At the same time these chapters capture the confusion in the university sector over explaining academic work to a broader public and prioritizing its multiple purposes Authors examine these practical challenges and the implications of different approaches in different contexts
