Organizations Peter J. Fos, David J. Fine, 2012-06-28 *Managerial Epidemiology for Health Care Organizations* provides readers with a thorough and comprehensive understanding of the application of epidemiological principles to the delivery of health care services and management of health care organizations. As health administration becomes evidence and population based, it becomes critical to understand the impact of disease on populations of people in a service area. This book also addresses the need of health organizations to demonstrate emergency preparedness and respond to bioterrorism threats. A follow up to the standard text in the field, this book introduces core epidemiology principles and clearly illustrates their essential applications in planning, evaluating and managing health care for populations. This book demonstrates how health care executives can incorporate the practice of epidemiology into their various management functions and is rich with current examples, concepts and case studies that reinforce the essential theories, methods and applications of managerial epidemiology.

Textbook in Psychiatric Epidemiology Ming T. Tsuang, Mauricio Tohen, 2003-04-14 The new edition of this critically praised text continues to provide the most comprehensive overview of the concepts, methods and research advances in the field. This comprehensive publication now includes new chapters on child psychiatry, community studies and perinatal studies.

Critical Appraisal of Epidemiological Studies and Clinical Trials Mark Elwood, 2025-05-01 *Critical Appraisal of Epidemiological Studies and Clinical Trials* 5th edition is the definitive resource on how to assess new studies in epidemiology, public health, research methods, evidence based methods, clinical medicine and environmental health. Students, practitioners and researchers will find this text invaluable in assessing studies carefully and deciding how reliable the results are. The book not only equips readers with the necessary skills and knowledge but also encourages them to apply critical thinking within a framework of critical appraisal that can be applied to any type of study assessing the relationship between what is experienced and what eventuates. The method presented applies to various healthcare issues including medical and non medical disciplines, legal issues in health and many areas outside healthcare. This new 5th edition is revised throughout with new concepts and examples. Throughout, core text has been extensively updated, including the sections on the approach to assessment, study design and selection of subjects, observation bias, confounding, data analysis, systematic review and meta analysis. These are followed by examples of applying the scheme of critical appraisal to interesting published studies, randomized trials, cohort studies and case control studies. An appendix is provided that summarizes statistical methods and valuable statistical tables. It is essential reading for postgraduates, practitioners and policymakers in the fields of epidemiology, public health, research methods, evidence based methods, clinical medicine and environmental health.
