On Moral Law and Quest for Selfhood Mohan Parasain,2016-07-15 This book offers an original intersection of concepts from Immanuel Kant's moral command ethics and Søren Kierkegaard's existential ethics The Kantian formulation of moral law is based on theoretical ground while Kierkegaardian ethics of the quest for selfhood views it as the very act of living The present work provides an account of both these perspectives and questions whether these approaches to morality are mutually exclusionary Using Slavoj Žižek's parallax view in the realm of morality it argues that moral philosophy must engage with a constant critique of difference around which the transformation of our various perspectives to morality revolves This work appeals for furtherance of the conversation model and participation of perspectives to transcend positional confinement It advocates the traversing of the ethical parallax to allow for intellectual openness and an empathetic perception of the other Engaging and well researched this book will be of interest to scholars and researchers of ethics political philosophy and continental philosophy

Living with the Dead J. Jeremy Wisniewski,2023-04-14 This book explores the moral place of the dead in our lives and in our afterlives It argues that our lives are saturated by the past intentions and values of the dead and that we offer the dead a form of modest immortality by fulfilling our obligations to remember them In the first part of the book the author examines the scope and limits of our obligations to the dead Our obligations to respect the wishes of the dead are more substantial than commonly acknowledged but they can be overridden in a range of cases when they conflict with the vital interests of the living such as in organ donation and wealth inheritance By contrast the author contends that the obligation to remember at least collectively cannot be completely overridden In the second part of the book the author argues that tradition offers the dead a form of modest immortality the dead live on insofar as we enact those intentional states with which they most identified He draws on the Confucian view of ritual to argue that ritual absorption reincarnates the dead in the actions of the living Finally the author defends a Jamesian account of a pluralistic self that is consistent with the view that we have obligations to the individual dead and that the selves of the dead are pragmatic constructions Living with the Dead will appeal to scholars and students interested in the philosophy of death ethics and cross cultural philosophy
