Methodological issues in accounting research

Zahirul Hoque, 2018-03-26 What is my theory How do I choose a theory Why and how should I employ a particular method for collecting the empirical data These basic questions concern everyone involved in research A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting All the chapters provide both retrospective and contemporary views by scholars in the field Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research This second edition has also introduced a number of new chapters covering strategy management control as practice grounded theory approach institutional logic and rhetoric social interaction theory actor network theory and practice theory The book is primarily intended for research students and academic researchers It can also be used for undergraduate Honours course as well as postgraduate accounting and business methodology courses Research organisations and consulting firms in accounting and business fields may also find this book useful The principal aims of this second edition are 1 to update the chapters previously published in 2006 and 2 to introduce new chapters documenting recent developments in accounting research

Positional Analysis for Sustainable

Development Judy Brown, Peter Soderbaum, Malgorzata Dereniowska, 2017-05-18 Climate change biodiversity loss pollution of land and water land use changes lack of equality and other problems at local national and global levels represent a challenge for economics as a social science Mainstream neoclassical economics may be able to contribute to a more sustainable society but it has also played a dominant role in a period where problems have been aggravated A pluralist and democratic view of economics is therefore very much warranted This book presents a multidimensional and ideologically more open view of economics understanding economics in multidimensional terms is in accordance with the 17 sustainable

development goals recognized by nations at the UN level in 2015 Accordingly approaches to decision making and accounting at the national and business levels have to be reconsidered Neoclassical Cost Benefit Analysis CBA with focus on the monetary dimension and an assumed consensus about a specific market ideology to be applied is not compatible with democratic societies where citizen and actors in other roles normally differ with respect to ideological orientation Environmental Impact Statements and Multi Criteria methods are used to some extent to broaden approaches to decision making In this book Positional Analysis is advocated as a multidimensional and ideologically open approach Positional Analysis is based on a political economic conceptual framework as part of ecological economics that differs from neoclassical ideas of individuals firms and markets And since approaches to decision making and to accounting are closely connected a new theoretical perspective in economics similarly raises issues of how national and business accounting can be opened up to meet present demands among various actors in society This perspective raises also numerous ethical questions at the science and policy interface that need to be properly addressed for sustainability decision making
