

and that an African scholar discovered the Western addiction to key relationship, and used this discovery for a better understanding of Western music.

The book has been magnificently produced, with the aid of a generous grant from the School of African and Oriental Studies of the University of London.

New Methods in Vocal Folk Music Research. KARL DAHLBACK. (Oslo University Press, Oslo, 1958.) 206 pp. 12 kr.

The new methods here described consist in the use of electronic equipment of an advanced design (for which credit must go to Sivilingeniør J. Sandstad) and the skilful use of "special material for checking the stability of performers" (p. 200)—the so-called control. Your reviewer is not competent to comment on electronics but understands that the average field recording, even if made on good equipment, would not be good enough for Dahlback's experiments.

What makes Dahlback's work so attractive are the results, which justify the new methods. In the centre of the author's interests stand the "mountain shepherds' calls," the *Lokk* (cf. *JIFMC*, Vol. VIII, 1956, p. 7). "Gliding intonation" is found to be "very characteristic of many types of *Lokk* singing" (p. 94). Dahlback emphasizes that it is traditional, quite independent of the singers' foibles or age, and it is not affected by educational standards (p. 107). But its use is in decline (p. 112). The position of the *Lokks* in relation to other Norwegian folk traditions is examined.

Another archaic feature that is disappearing is the melismatic manner of singing, "which a few folk singers still retain and which is considered to be characteristic of the performance of religious tunes in former times" (p. 120, cf. also p. 146). "The vibrato of Norwegian folk singers is ordinarily of relatively small extent" (p. 85) and in this "differs considerably from that of ordinary music." It does not affect pitch, which is "incredibly stable," even in long tones (p. 143). Intermediate tone steps occur often. "Tonal wavering," i.e. uncertain intonation is carefully studied and discussed.

Some non-Norwegian material is also represented by graphs from Sweden, Czechoslovakia and Afghanistan (pp. 148-158). The reference to the Muezzin calls from Afghanistan and Curt Sachs's general remark about the significance of a "small melodic compass" are puzzling. But it must be remembered that by making these brief comparisons, Dahlback intended no more than to open vistas for further research. The relationship shown between folk songs of the Lapps and *Lokk* music is convincing (p. 114). The close relationship between *Lokk* singing and religious singing in Norway is interesting (p. 146). The fact that no organs were used in several communities until recently is mentioned as having aided in the preservation of old folk singing styles. On the tricky question of the genesis of scales, Dahlback contradicts those of his fellow-countrymen who believe that certain folk intervals are derived from peculiarities of certain folk instruments (pp. 162-165).

In these investigations, the evidence—apart from a description of the tests—is offered in oscillographs, and almost half of the book consists of oscillographs. This is only right and proper in the circumstances, but one wishes that the last two pages, headed "Final Remarks," which deal with the new methods, had been matched by a systematic summary of the far-reaching results of the investigations.

Ethnomusicology: a study of its nature, its problems, methods and representative personalities. JAAP KUNST. Third edition. (Martinus Nijhoff, The Hague, 1959.) 303 pp. and supplement. Guilders 23.75.

With this third edition Jaap Kunst's *Ethnomusicology* has come appreciably nearer to the realization of his ideal of giving a list of publications (including magazine articles all over the world) on this diffuse subject. The items listed number nearly 5,000 and they cover an astonishingly wide range. Even so, new publications continue to appear,
