Entrepreneurship Thierry Burger-Helmchen, 2012-03-14 Entrepreneurship has a tremendous impact on the economic development of a country As can be expected many public policies foster the development of self entrepreneurship in times of unemployment praise the creation of firms and consider the willingness to start new ventures as a sign of good fortune Are those behaviours inherent to a human being to his genetic code his psychology or can students younger children or even adults be taught to become entrepreneurs What should be the position of universities of policy makers and how much does it matter for a country This book presents several articles following different research approaches to answer those difficult questions The researchers explore in particular the psychology of entrepreneurship the role of academia and the macroeconomic impact of entrepreneurship **Erfolgsfaktoren bei der Unternehmensgründung** Liv Kirsten Jacobsen, 2006-05-30 Liv Kirsten Jacobsen analysiert zahlreiche empirische Daten die in den Vereinigten Staaten und Deutschland veröffentlicht wurden und filtert sechzehn Faktoren heraus die sich in den meisten Studien als tatsächlich erfolgsrelevant erwiesen haben Ihr Erfolgsmodell zeichnet sich dadurch aus dass es den Erfolg als zu erklärende Größe in den Mittelpunkt stellt und eine Reihe unterschiedlicher interdisziplinärer Forschungsrichtungen vereint **Social Enterprise**

Values and Processes Edakkandi Meethal Reji, Satyajit Majumdar, 2024-08-07 This edited volume is an interdisciplinary approach towards examining and integrating diverse theories, methodologies and practices of social entrepreneurship. It highlights how social enterprises with their focus on resolving societal problems and driving social change are critical for inclusive economic growth. The book is organized in three parts: values, sustainability and social enterprise models; context, innovation and technology; and perspectives and directions of future research in social entrepreneurship. The chapters contribute towards a better understanding of organizational and process dimensions of social and economic value creation, a relatively under-researched area in social entrepreneurship. They capture an extensive range of insights, analysis and case studies bringing together context-specific dimensions and variables supportive of social enterprise creation and the development processes in social value creation. The book is useful for a wide range of audiences including social entrepreneurs, researchers, policy makers, development professionals, graduate and post graduate students seeking a deeper understanding of this evolving field. It also emphasizes practical guidance for individuals and organizations involved in social enterprise. It offers actionable insights, best practices and real world examples enabling readers to apply the knowledge gained to their own contexts and effectively navigate the challenges and opportunities encountered in the field. **ECIE**

Entrepreneurship Education and Training Programs around the World Alexandria Valerio, Brent Parton, Alicia Robb, 2014-05-06 Entrepreneurship has attracted global interest for its potential to catalyze economic and social development. Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training (EET). Despite the growth of EET, global knowledge about these programs and their impact remains thin. In response, this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape. The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups: entrepreneurship education and entrepreneurship training. These programs target a range of participants: secondary and post-secondary education students as well as potential and practicing entrepreneurs. The outcomes measured by program evaluations are equally diverse but generally fall under the domains of

entrepreneurial mindsets and capabilities entrepreneurial status and entrepreneurial performance The dimensions of EET programs vary according the particular target group Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship while post secondary education programs emphasize skills related to strategic business planning Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited While programs serving practicing entrepreneurs focus on strengthening entrepreneurs knowledge skills and business practices which while unlikely to transform an enterprise in the near term may accrue benefits to entrepreneurs over time The study also offers implications for policy and program implementation emphasizing the importance of clarity about target groups and desired outcomes when making program choices and sound understanding of extent to which publicly supported programs offer a broader public good and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives

Der kreative Entrepreneur Christian Horneber, 2012-11-02 Allgemein wird Kreativität für Unternehmensgründerinnen und Gründer als Schlüssel zum Erfolg betrachtet Sei es etwa bei der eigentlichen Ideenfindung für neue Produkte oder dem Design von innovativen Unternehmensstrategien Doch zunehmend mehr Startups orientieren sich als Copycats an bereits erfolgreichen Geschäftsmodellen Ist das Bild von den kreativen Gründern damit hinflüchtig und etwa nur ein Mythos Dieser Frage geht Christian Horneber empirisch mit Hilfe von psychometrischen Verfahren umfassend auf den Grund So kann er zeigen dass Entrepreneure tatsächlich über ein gesteigertes kreatives Potenzial verfügen Ein Zusammenhang zwischen Kreativität und unternehmerischem Erfolg konnte indes nicht identifiziert werden
