

Philosophy of Nursing Paper

When writing about a personal nursing philosophy you should know what exactly a nursing philosophy is. Nursing is a professional career within a healthcare sector setting that focuses on caring for the wounded or ill and in some cases, such as the labor and delivery unit, you care for healthy patients. You are not limited to a specific criterion for those you care for. You may care for entire families or only one individual from a family. Nursing should encompass the concepts of patients, health, environment, and nurse with the quality of caring. (Ryan, 2016) "Philosophy is the study of wisdom, fundamental knowledge, and the processes used to develop and construct one's perceptions of life. Philosophy provides a viewpoint and implies a system of values and beliefs. Each individual develops a personal philosophy to give meaning to experiences and to guide behavior and attitudes. Personal philosophies are developed by learning from interpersonal relationships, through formal and informal educational experiences, through religion and culture, and from the environment" (Taylor, Lillis, Lynn, & LeMone, 2015).

Nursing is not just a career that I can achieve, it is also something that can benefit my self-worth. Being a nurse does not only take significant skill, time and education, but it also takes heart. If you are not someone who enjoys helping people and learning new things as you go along, then nursing may not be the right fit for someone. To be a good nurse, it takes a lot of patience, have a willingness to grow and learn, and requires you to be very caring and thoughtful. You must want to help others around you and achieve a love and a drive to succeed in a goal such as helping a patient achieve optimal health or make it through a hardship.

There is a list of specific characteristics that should accompany every good nurse. Communication is one of the key characteristics, since you use it to build a patient-nurse relationship and use it to maintain a solid foundation in your work setting. Attention to detail because, one small mistake can do more harm than help and it's crucial to keep your patients safe. Empathy, emotional stability and flexibility because, you are in an area where tremendous amounts of tragic and traumatic incidents can happen. A good nurse must be able to handle the pressure while still staying focused and successfully caring for the people around. Problem solving skills and quick response is another characteristic that's crucial. A nurse must be able to quickly identify a problem and do what's necessary to correct the problem in a timely and acceptable manner. Time is of the essence in the nursing field. Finally, a good nurse must have respect for others. Respect can go a long way in helping build a relationship that's trusting and kind, weather that be in patients, their families or coworkers. (Hughes, 2015)

The nurse executive's role as a member of the executive team is examined as well as the nurse executive's role in health care issues such as quality outcomes, team building, and cost containment. Philosophy of Nursing Steven Edwards, 2001-04-06 This book provides an introduction to a new and emerging area of nursing scholarship: that of philosophy of nursing. It describes the nature of philosophy of nursing and then focuses on three areas of enquiry central to nursing theory and practice: knowledge, persons, and care. Having developed positive accounts of these key areas, the nature of nursing is then examined. Throughout, there is critical engagement with the work of leading nurse writers, in particular Benner and Wrubel and Carper.

Nursing Theory, Postmodernism, Post-structuralism, and Foucault Olga Petrovskaya,2022-09-30 Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
