Methods of Environmental and Social Impact Assessment Peter Morris, Riki Therivel, Graham Wood, 2017-09-13

Environmental and social impact assessment ESIA is an important and often obligatory part of proposing or launching any development project. Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required. Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently. This new edition explains how an ESIA works and how it should be carried out, demonstrates the links between socio-economic, cultural, environmental and ecological systems and assessments, incorporates the World Bank's IFC performance standards and best practice examples from developing as well as developed countries, includes new chapters on emerging ESIA topics such as climate change, ecosystem services, cultural impacts, resource efficiency, land acquisition and involuntary resettlement. Invaluable to undergraduate and MSc students of ESIA on planning, ecology, geography and environment courses, this internationally oriented fourth edition of *Methods of Environmental and Social Impact Assessment* is also of great use to planners, ESIA practitioners and professionals seeking to update their skills.

**The Impact of Mining Lifecycles in Mongolia and Kyrgyzstan** Troy Sternberg, Kemel Toktomushev, Byambabaatar Ichinkhorloo, 2021-09-26. This volume investigates how mining affects societies and communities in Mongolia and Kyrgyzstan. As ex-Soviet states, Mongolia and Kyrgyzstan share history, culture and transitions to democracy. Most importantly, both are mineral-rich countries on China's frontier and epicentres of resource extraction. This volume examines challenges communities in these countries encounter on the long journey through resource exploration, extraction and mine closure. The book is organised into three related sections that travel from mine licensing and instigation to early anticipation of benefit through the realisation of social and environmental impacts to finite issues such as jobs, monitoring, dispute resolution and reclamation. Most originally, each chapter will include a final section entitled 'Notes from the field' that presents the voice of in-country researchers and stakeholders. These sections will provide local contextual knowledge on the chapter's theme by practitioners from Mongolia and Central Asia. The volume thereby offers a distinctively grounded perspective on the tensions and benefits of mining in this dynamic region. Using Mongolia and Kyrgyzstan as case studies, the volume reflects on the evolving challenges communities and societies encounter with resource extraction worldwide. The book will be of great interest to students and scholars of mining and natural resource extraction, corporate social responsibility and sustainable development.

#### **The Practice of Independent Accountability Mechanisms (IAMs)**

Owen McIntyre, Suresh Nanwani, 2019-11-04. Multilateral development banks and other development agencies have adopted environmental and social safeguard policies setting due diligence standards for the provision of project finance. Such policies are evolving in terms of the activities covered and in their normative requirements. Recent iterations incorporate human rights requirements recognising the imperative of adopting human rights based approaches to development. Each institution has also established independent accountability mechanisms (IAM) variously functioning to ensure compliance with the applicable safeguards, to advise management regarding the application of the obligations involved and to facilitate communication with affected communities and individuals with a view to resolving project related disputes. IAMs are central to the implementation, interpretation and ongoing elaboration of safeguard policies and thus to the environmental and social good governance so essential for sustainable development. This edited volume presents a series of in depth examinations by leading experts from banking institutions, academia and civil society of key aspects of the rapidly evolving practice of IAMs and of the implications of such practice for environmental and social governance.

Asian Development Bank, JICA, UKAID, World Bank, 2018-03-19. The WEB of Transport Corridors in South Asia develops a holistic appraisal methodology to ensure that economic benefits of investments in transport corridors are amplified and more widely spread and possible negative impacts such as congestion, environmental degradation and other unintended consequences are minimized. It focuses on South Asia not only as one of the world's most populous and poorest regions but as a hinge between East Asia, Central Asia, the Middle East and Europe. The book is aimed at politicians, technocrats, civil society organizations and businesses. It presents case studies of past and recent corridor initiatives, provides rigorous analysis of the literature on the spatial impact of corridors and offers assessments of corridor investment projects supported by international development organizations. A series of spotlights examines such issues as private sector co-investment, the impacts of corridors on small enterprises and women and issues with implementing cross border corridors. The WEB in the title stands for both the wider economic benefits (WEB) that transport corridors are expected to generate and the complex web of transport corridors that has been proposed. The appraisal methodology introduced in this book shows how the web of interconnected elements around corridors can be disentangled and the most promising corridor proposals, the ones with the greatest wider economic benefits, can be selected.
