Pathways to Professionalism in English Language Teaching

Natalia Orlova, Christoph Haase, 2025-02-03 This volume represents the seventh entry in our ongoing series dedicated to current research results in English Language Teaching (ELT) and Applied Linguistics. It slightly alters the focus from previous volumes which emphasized experience with technology and the development of attitudes to the teaching process. Instead data driven empirical research takes a pivotal role. The present volume thus compiles papers which emphasize the empirically grounded approach to acquiring as well as teaching the English language. This spectrum of perspectives is reflected in the contributions to this volume. Different backgrounds contribute and enhance their common objective. They are here assembled and organized by the different disciplines: English teaching methodology, linguistic and cultural and literary studies. Academic research results are the true pathways to professionalism in ELT and their reflection and innovation can be found in these pages.

Ideas and Options in English for Specific Purposes Helen Basturkmen, 2014-03-14 This volume presents a range of views about language learning and teaching in English for Specific Purposes (ESP). Its purpose is to go beyond individual cases and practices to examine the approaches and ideas on which they are based. The aim is for readers to adopt an analytical stance toward the field and to identify current perspectives in ESP and the ideas driving them. *Ideas and Options in English for Specific Purposes* does not promote any one approach but rather identifies and illustrates those in evidence today. The main emphasis is on the links between theory and ESP teaching and research. Ideas from linguistics, sociolinguistics, education, SLA and social theories are described. Links are then made between these ideas and ESP course designs, instructional materials and research projects. Thus the book moves back and forth between descriptions of theories, teaching practice and research. Part I introduces the book's approach to description of ESP and the framework used to investigate it. Part II examines ideas of language learning and teaching in ESP. Recognizing that ESP is taught in many different countries and contexts the author draws on a wide range of examples of teaching practice and research from around the world and from different branches of ESP including English for Academic Purposes, English for Professional Purposes and English for Vocational Purposes. From Chapter 3 onward each chapter includes Questions for Discussion and Projects to encourage readers to research and analyze the practices of ESP in their own contexts and to consider the ideas
