*Multilateralism in the Indo-Pacific* Swaran Singh, Reena Marwah, 2022-08-05 This book focuses on emerging new multilateralism in the Indo Pacific and offers a useful analysis of various existing and evolving formulations and alignments in the region. The book problematises the evolution, relevance and changing contours of emerging economic and security architectures and connects these to various unilateral and multilateral initiatives that undergird the overall transformation in these economic and strategic multilaterals in this region. The chapters offer a comprehensive overview of organisations and institutions and the contributors provide their historical background and contemporary focus with implications for the future. Consequently, the book provides a balanced assessment of evolving trends elucidated by both its theoretical debates and empirical analyses. It assesses the outline and influence of non-traditional threats that have received only stand-alone and not integrated examination involving issues as climate change, piracy, smuggling and terrorist activity triggering a whole gamut of humanitarian and disaster relief strategies. Comprehensive in analysis and approach, the book will be of interest to scholars of Political Science, Foreign Policy, Security Studies, International Relations, International Political Economy and Area Studies including Asian, East Asian or Indo-Pacific Studies. [Principles of International Politics](#) Bruce Bueno de Mesquita, 2013-01-14 Renowned scholar Bruce Bueno de Mesquita, who set the standard for the scientific approach to international relations and transformed the field, has returned with a reformulated fifth edition based on extensive reviewer feedback and guided by an emphasis on questions about the causes and consequences of war, peace and world order. More than ever before, the strategic perspective in international relations is examined with complete clarity, precision and accessibility. What hasn't changed is Bueno de Mesquita's commitment to covering the fundamentals of IR. The foundational topics and examination are all there: the major theories of war, the domestic sources of international politics, an exploration of the democratic peace, the problems of terrorism, the role of foreign aid, democratization, international political economy, globalization, international organizations, international law and the global environment. The first part of the book, *Foundations*, offers highly accessible coverage of key concepts, introducing students to different ways to think about the national interest and showing them how to use game theory and the strategic perspective, selectorate theory to better understand what happens in all aspects of international affairs. This section uses debate over North Korea's nuclear weapons development as an ongoing example to build concepts and build confidence in the student's grasp of basic modeling ideas. Also covered is a basic, intuitive introduction to game theory and other evidence and logic-based tools for analyzing international relations. Part II, *War*, next provides a more thorough evaluation of how domestic political incentives and the domestic institutions of governance shape choices about conflict initiation, escalation and termination. It also surveys major theories of war and conflict, working through hypotheses derived from constructivism, neo-realism, liberalism and selectorate theory and evaluating them against the evidence to see what actually works and what doesn't. Chapters in Part III, *Peace*, build on the

logic of collective action to help students see why it is so difficult to get national governments to do what is right even when they can agree on what is right with chapters covering the effectiveness of international organizations and international law as well as a thorough evaluation of environmental issues human rights enforcement and the domestic and the international political economy of trade Part IV World Order emphasizes efforts to promote the spread of democracy and economic prosperity It also addresses how to understand and deal with terrorism Whether examining terrorism the spread of democracy or the alleviation of poverty chapters in this section carefully examine which strategies work which do not and why The Arab Spring provides a useful ongoing example of the strengths and weaknesses of foreign aid policy and military intervention policies No other introductory text delivers such an easily understood contemporary explanation of international politics while truly enabling students to learn how to mobilize the key concepts and models themselves thus develop a new method for thinking about world affairs More than ever before Principles provides a comprehensive evaluation of all aspects of international affairs systematically compares the accuracy of competing approaches to international relations and walks students through the simple intuitive models and games that capture the essence of the strategic selectorate viewpoint

favours protectionism and opposes immigration Distance is the new frontier for some remote players are rejected in favour of identities closer to home This divide plays out in relation to the notion of face as individuals react to faceless organisations and processes such as globalisation and automation responding to a sense of alienation on social media and developing a conception of themselves as networked individuals Thus we move towards a type of society characterised not by honour and dishonour or right and wrong but by voice and choice A fascinating and very accessible analysis of the divisions and transformations that have come to dominate the contemporary landscape this book will appeal to political leaders and social scientists with interests in globalisation social movements and social theory

*Danger Zone: The Coming Conflict with China* Michael Beckley, Hal Brands, 2022-08-16 A provocative and urgent analysis of the U S China rivalry It has become conventional wisdom that America and China are running a superpower marathon that may last a century Yet Hal Brands and Michael Beckley pose a counterintuitive question What if the sharpest phase of that competition is more like a decade long sprint The Sino American contest is driven by clashing geopolitical interests and a stark ideological dispute over whether authoritarianism or democracy will dominate the 21st century But both history and China s current trajectory suggest that this rivalry will reach its moment of maximum danger in the 2020s China is at a perilous moment strong enough to violently challenge the existing order yet losing confidence that time is on its side Numerous examples from antiquity to the present show that rising powers become most aggressive when their fortunes fade their difficulties multiply and they realize they must achieve their ambitions now or miss the chance to do so forever China has already started down this path Witness its aggression toward Taiwan its record breaking military buildup and its efforts to dominate the critical technologies that will shape the world s future Over the long run the Chinese challenge will most likely prove more manageable than many pessimists currently believe but during the 2020s the pace of Sino American conflict will accelerate and the prospect of war will be frighteningly real America Brands and Beckley argue will still need a sustainable approach to winning a protracted global competition But first it needs a near term strategy for navigating the danger zone ahead
